

The background image shows a wide city street with historic European-style buildings. On the left, there are several red and white trams. In the center, a modern yellow and grey tram is moving. On the right, a tram stop shelter is visible with people waiting. Pedestrians are walking on the sidewalks. The overall scene is bright and sunny.

Canterbury Passenger Rail Workshop 4

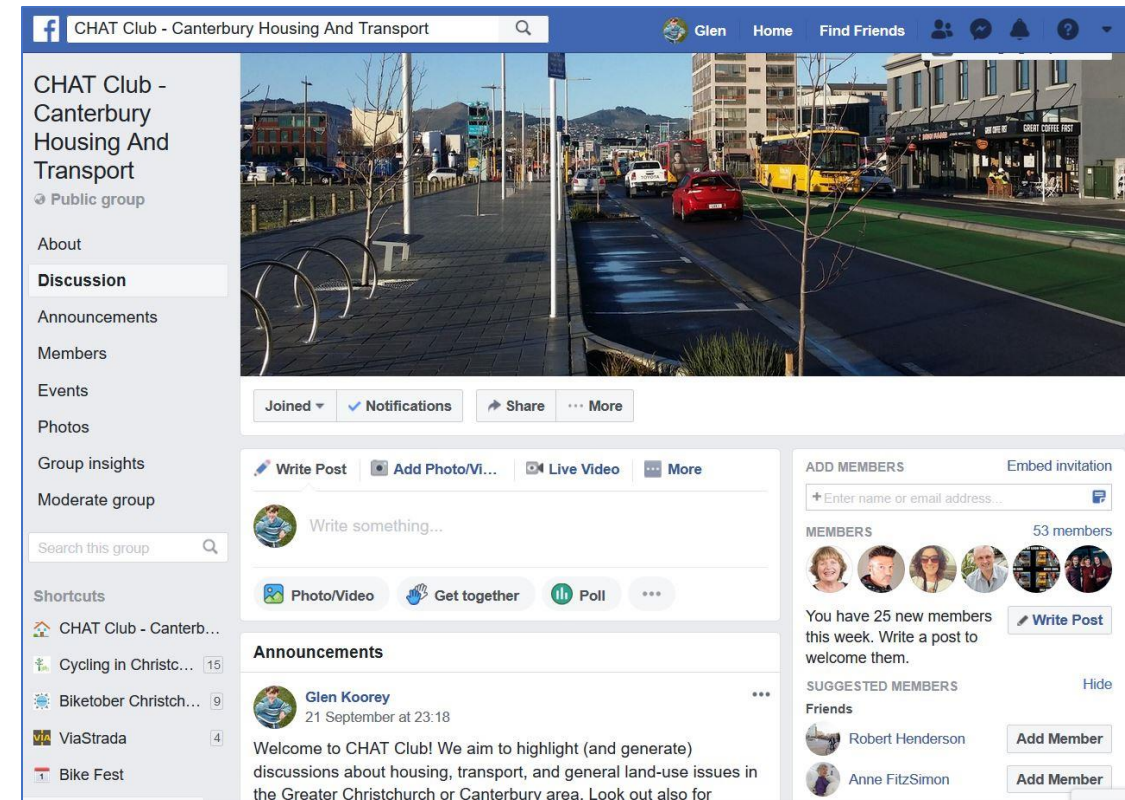

CHAT Club

27 May 2019

Programme for tonight (6.00 – 7.30)

- Recap – Roadmap
- Bus vs rail presentation (cost, perception, flexibility) – Glen
- Six options developed from your contributions – Axel
- Evaluation – Glen
 - Explain how we evaluate
 - Run through example
 - Group work
- Wrap-up / next steps – Axel

Menti exercise: **What do you think of tonight?**

Use your smartphone to give us some feedback throughout the evening

(you can wait until the end to do this survey)

- Go to www.menti.com
- Enter code number: **90 86 03**
- Write some comments (up to 250 characters)
 - What did you learn? What did you like?
 - What didn't we cover? What do you disagree with? etc, etc
- Click "Submit" *(You can submit more than one comment)*

A screenshot of the Mentimeter mobile app interface. It shows a text input field with the placeholder "Please enter the code" and a small "Q" icon on the left. The field contains the code "2 34 58". Below the field is a large blue "Submit" button. At the bottom, there is a small line of text: "The code is found on the screen in front of you".

Recap: Roadmap... the Endgame

Transport

Bus v Rail

Options

Evaluation

Governance

Funding

**A PLAN!
(and how to do it...)**

Land Use

A background image showing a blue tram (number 257) and a red bus (number 1001) at a station. The tram is labeled 'SCHAUINSLANDBAHN Freiburgs Gipfelfähre' and 'VAG'. The bus is labeled '1001' and 'VAG'. There are bicycles parked on the sidewalk and a sign with a green 'H' logo. The scene is outdoors with trees and a clear sky.

Bus vs Rail

Glen Koorey

Transport Engineer/Planner

“Why are you focusing on rail”?

- We’ve called these events “Passenger Rail workshops”
 - In truth, it was partly to grab your attention...
- But is rail the right/best solution?
 - Are we ignoring better options using buses?
- Back in February we briefly touched on the different modes
 - Want to explore their relative merits a bit more now

Recap: Some definitions

Heavy Rail (HRT)

- Trains using dedicated rail corridors

Light Rail (LRT, “trams”, “streetcars”)

- Trains using on-street railways and maybe dedicated corridors too

Bus Rapid Transit (BRT)

- Buses using dedicated corridors or priority lanes

Comparison: Construction Cost

Heavy Rail - LOW

- Rail corridors already exist N/SW/SE of Chch
- Some double-tracking or passing loops may be required

Light Rail - HIGH

- New on-street corridors need to be constructed
- Considerable cost (and disruption) to form new ROWs

Bus Rapid Transit - MEDIUM

- Dedicated corridors or priority lanes need to be built
- Cost vary - will depend on relative level of separation

Comparison: Flexibility

Heavy Rail - LOW

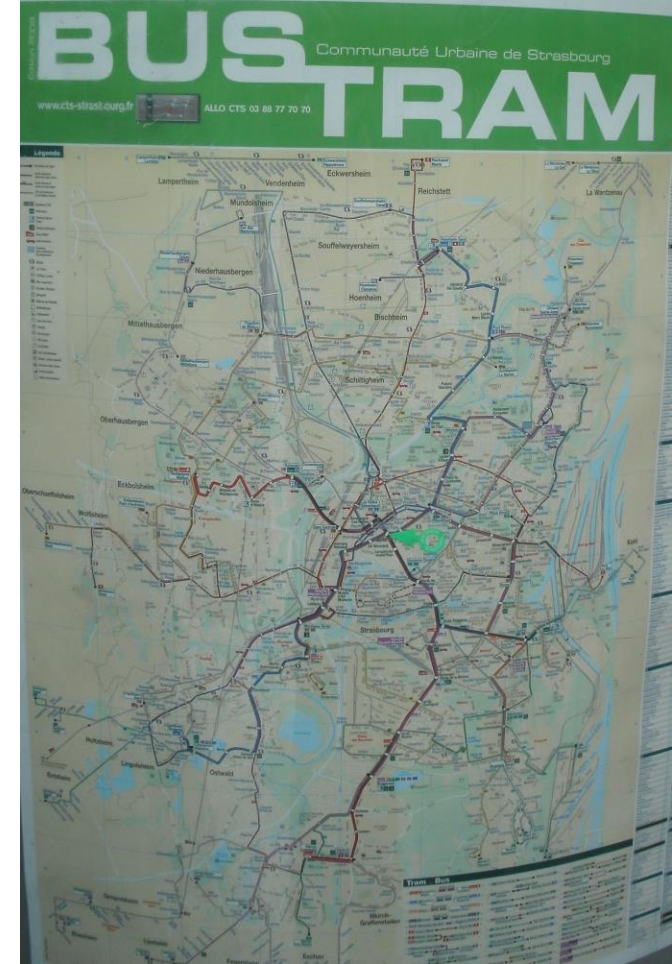

- Can't really change existing rail corridors easily

Light Rail - MEDIUM

- New LRT can be located where most useful
- Can't really change existing rail corridors easily

Bus Rapid Transit - MEDIUM

- Buses can easily be re-routed if necessary
 - Although that defeats the purpose of dedicated corridors...
- Can BRT corridors be converted to LRT later?

Comparison: Land Use Impact

Heavy Rail - HIGH

- More likely to encourage large-scale surrounding development

Light Rail - HIGH

- More likely to encourage large-scale surrounding development

Bus Rapid Transit - LOW

- Less likely to encourage large-scale surrounding development

Comparison: Station/Stop Spacings

Heavy Rail - LOW

- Typically 2km+
 - Reasonable distance required for acceleration/deceleration

Light Rail - MEDIUM

- Typically 1km+

Bus Rapid Transit - HIGH

- Typically 800m+
 - Limits usefulness of “express” services?

Comparison: Public Appeal

Heavy Rail - MEDIUM

- Can depend somewhat on train style

Light Rail - HIGH

- Modern trams often seen as “better”

Bus Rapid Transit – LOW

- Some bias against “buses” based on past experience

Comparison: Operating Costs (& Fares)

Heavy Rail - HIGH

- Additional train/station staff needed?

Light Rail - HIGH

- Similar costs to heavy rail?

Bus Rapid Transit - LOW

- Existing bus services relatively cheap
- Would we pay more for premium service?

Comparison Summary

	Heavy Rail	Light Rail	Bus Rapid Transit
Construction Cost	\$	\$ \$ \$	\$ \$
Flexibility		 	 
Land Use Impact	  	  	
Station/Stop Spacings	  	  	  
Public Appeal	 	  	
Operating Costs	\$ \$ \$	\$ \$ \$	\$

Take-away thoughts

- There is no fixed answer when it comes to various factors
 - Depends a lot on the relative quality of what you build
- Shouldn't get too hung up about which mode(s) to use
 - So long as they provide priority corridors and frequent services
 - But do rail-based options have better perceived appeal?

Keep these thoughts in mind when you do your evaluations later!

A photograph of a city street featuring a tram. The tram is orange and white, with 'easyJet' and 'Duisburg' visible on its side. It is stopped at a tram stop. The street is lined with trees and buildings. A pedestrian crossing with a checkered pattern is visible in the foreground. A traffic sign on the right reads 'let op! overstekende voetganger' (watch out! crossing pedestrian).

Six options

Axel Wilke

Transport Engineer/Planner

Background

- Bus network will always support any rapid transit solution
- Currently have 5 core routes
 - Orbiter (circular; **10** min headway)
 - Blue line (PMH to Rangiora; **15** min)
 - Yellow line (New Brighton to Rolleston; **15** min)
 - Orange line (Halswell to Queenspark; **15** min)
 - Purple line (Airport to Sumner; **15** min)
- All ex core routes proposed to go to 10 min headway

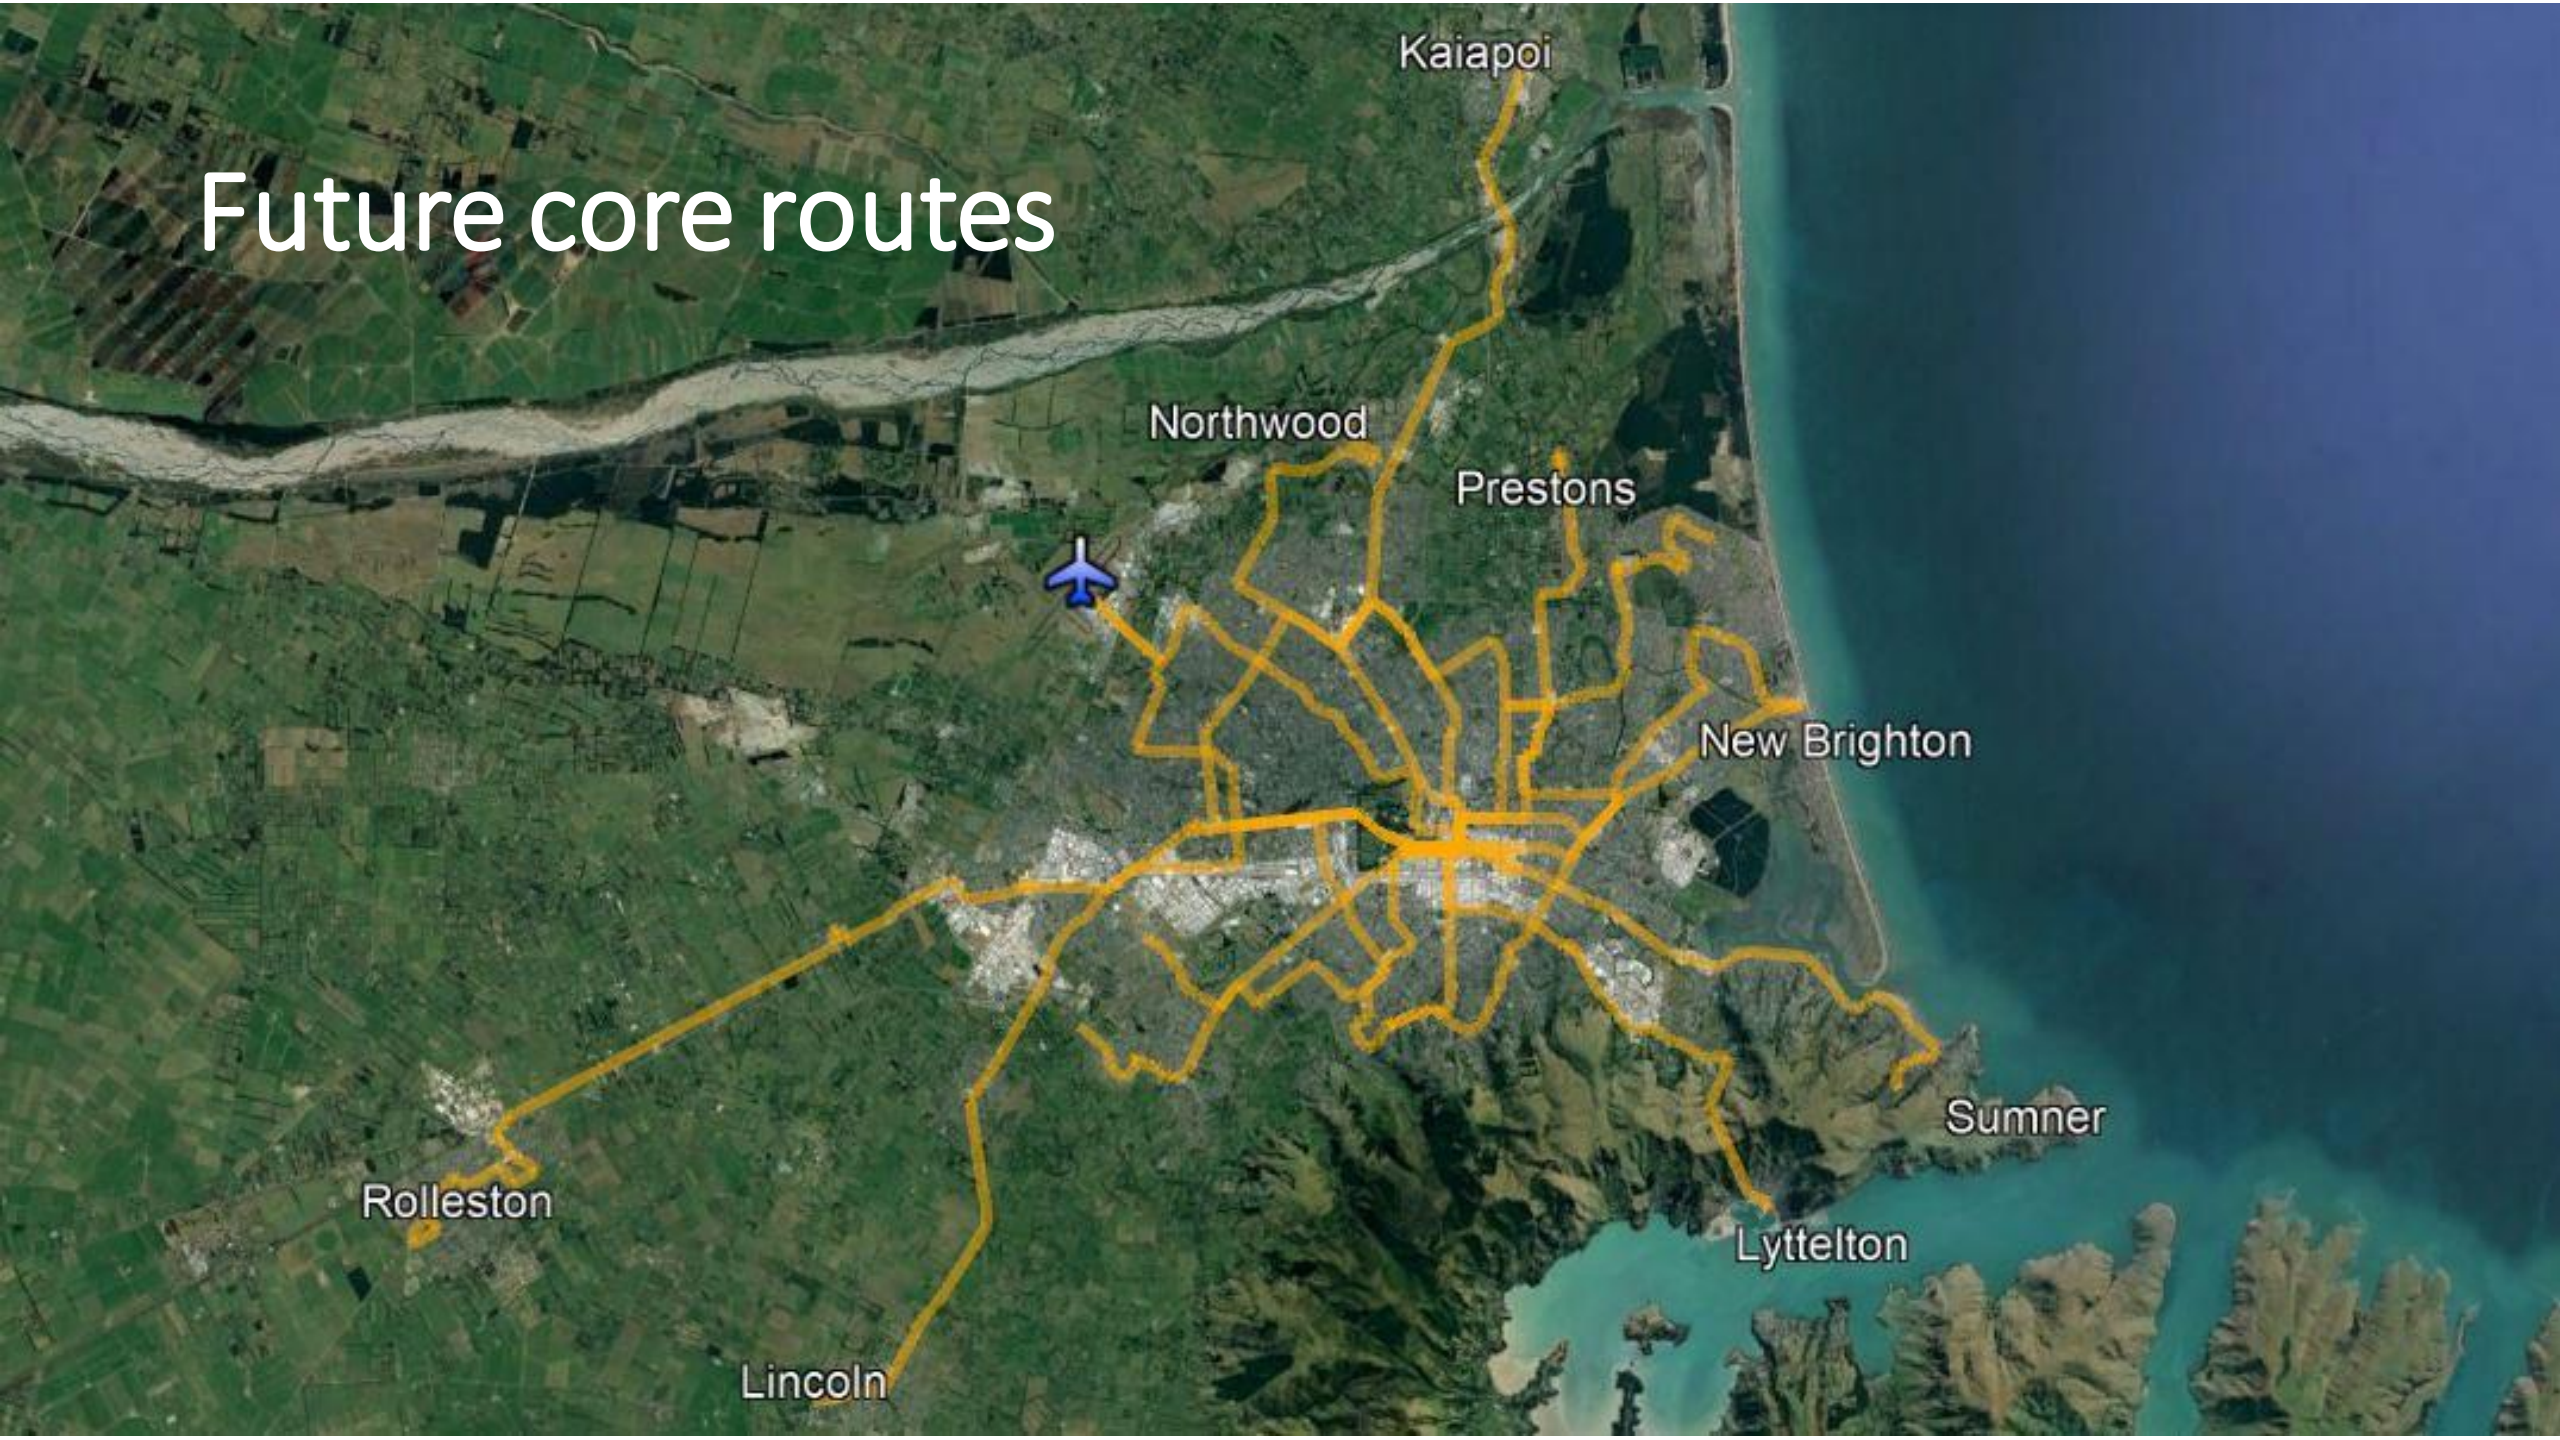

Existing core routes

Future core routes

Future core routes

Ex dense residential

Ex dense residential

Residential growth areas (“Our Space”)

Ex dense residential

Residential growth

Dense employment areas

Ex dense residential

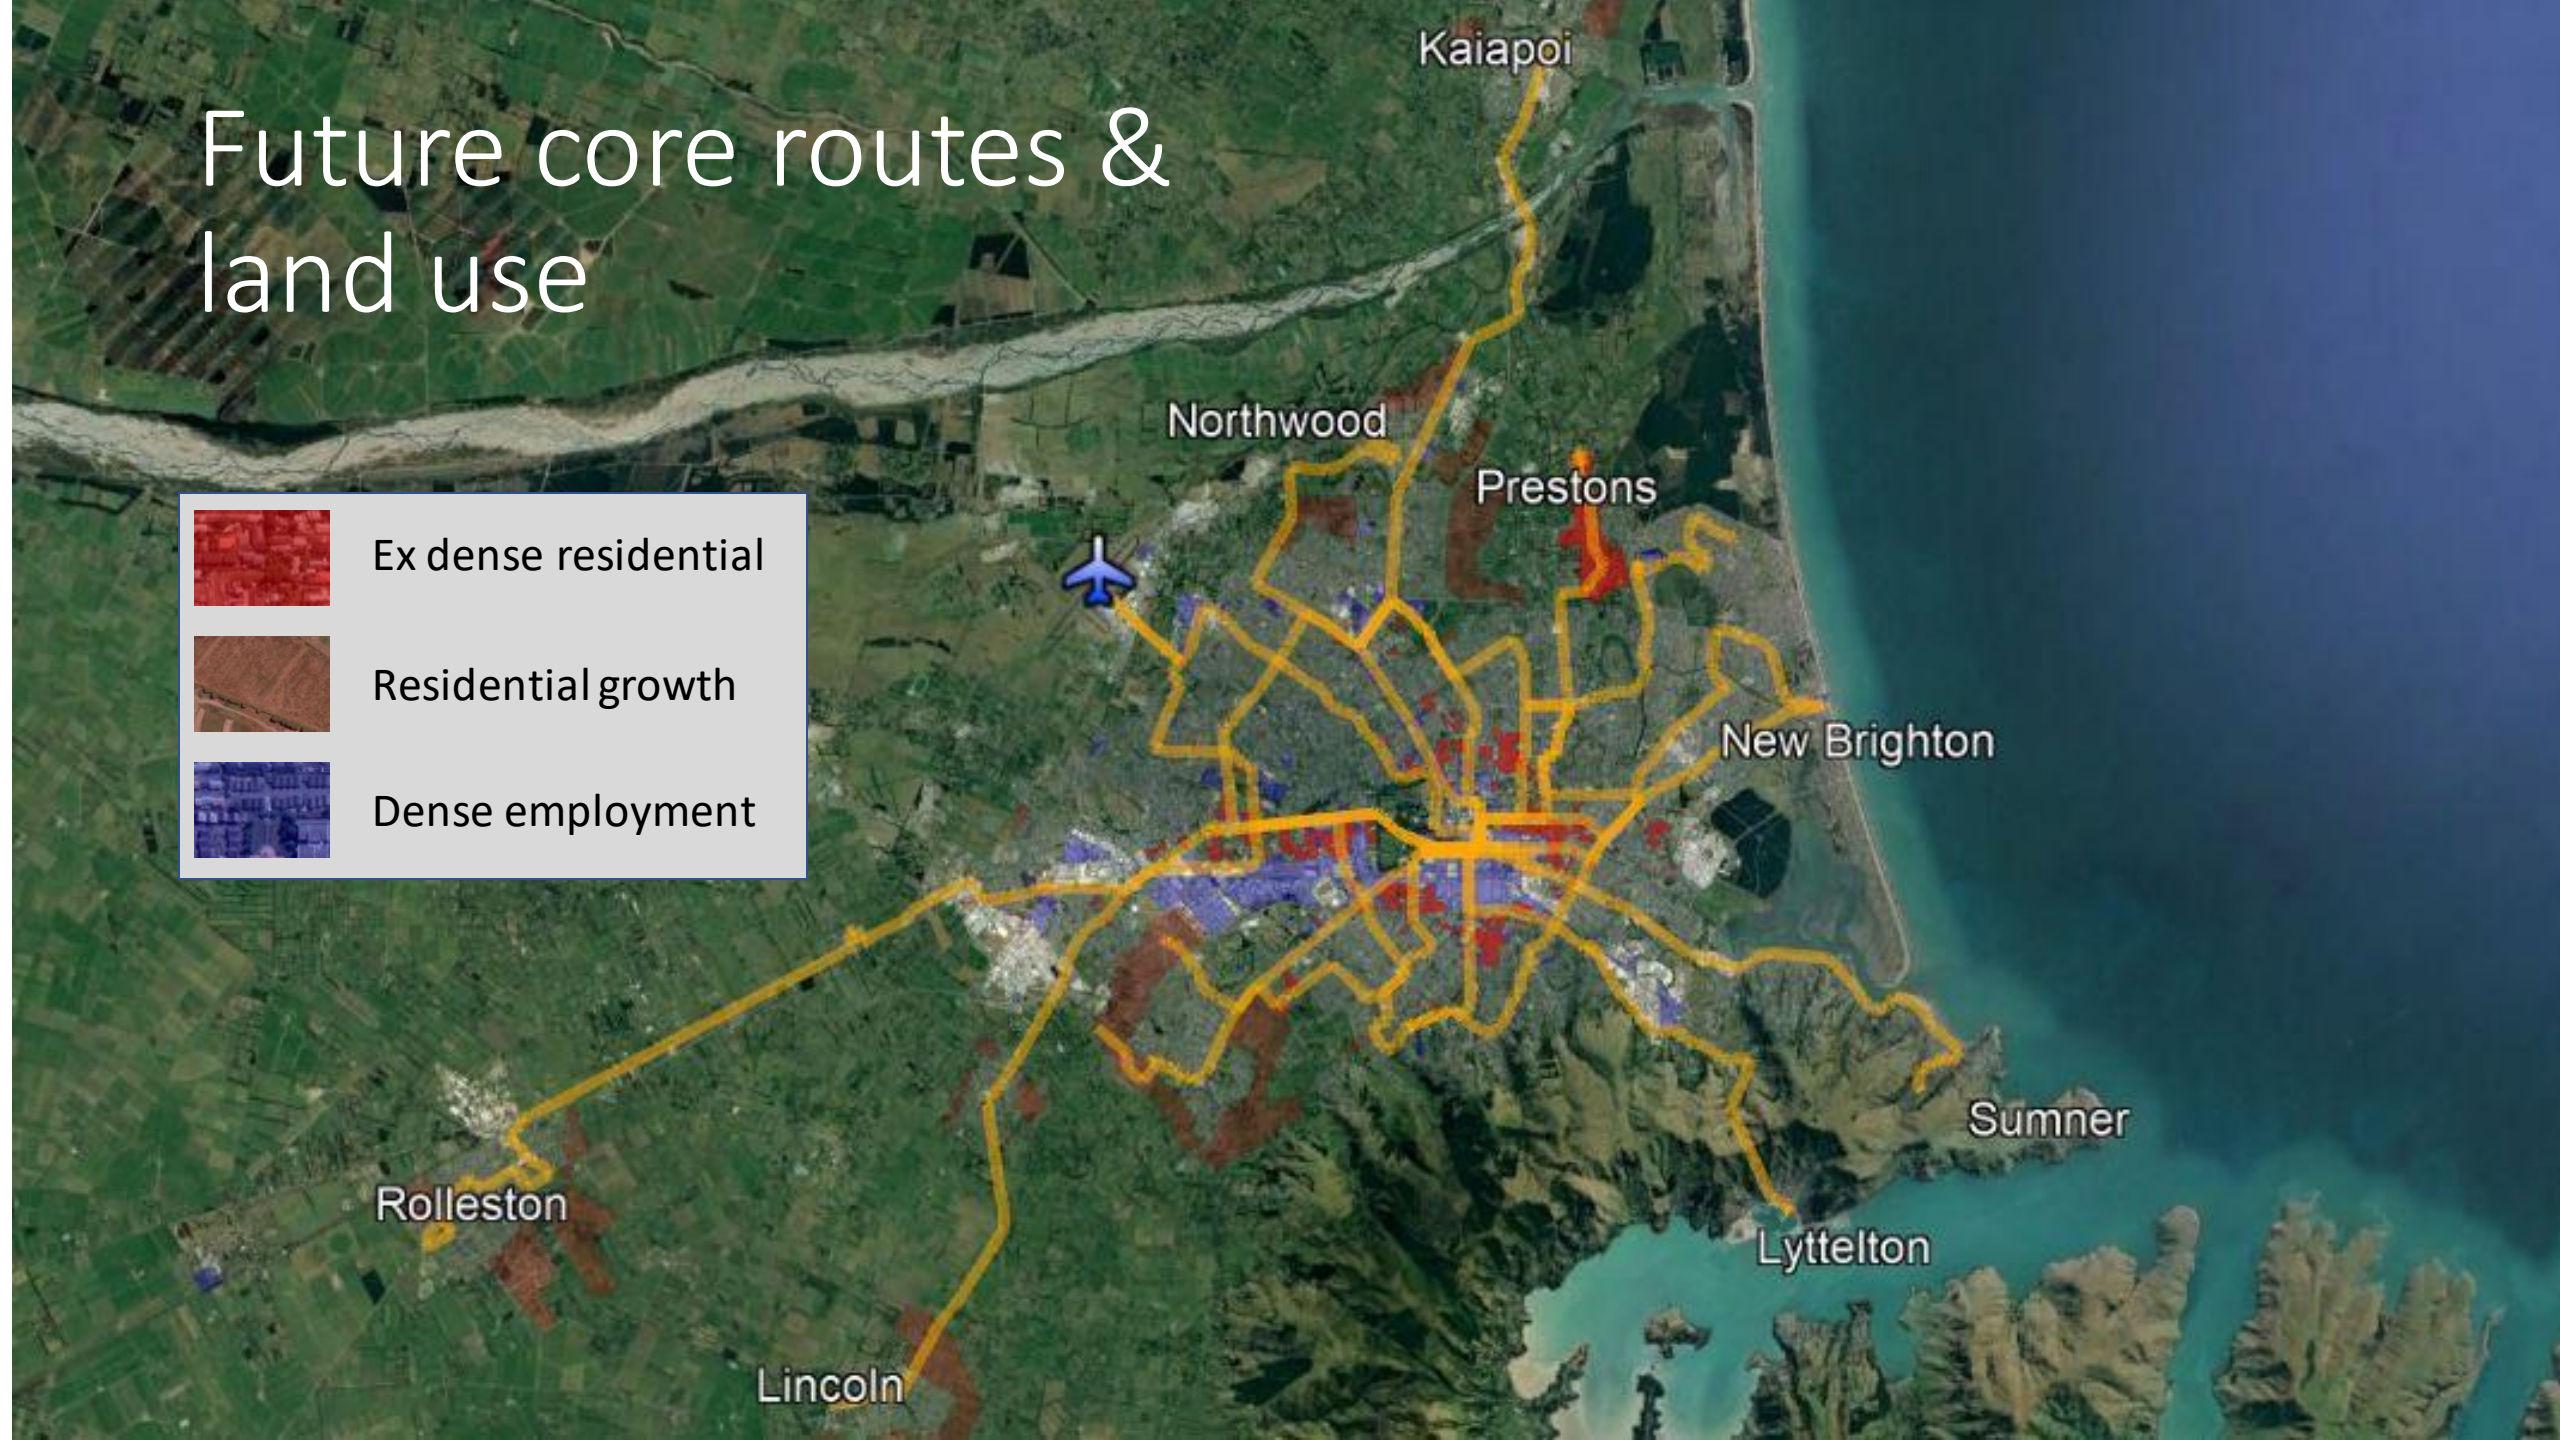

Residential growth

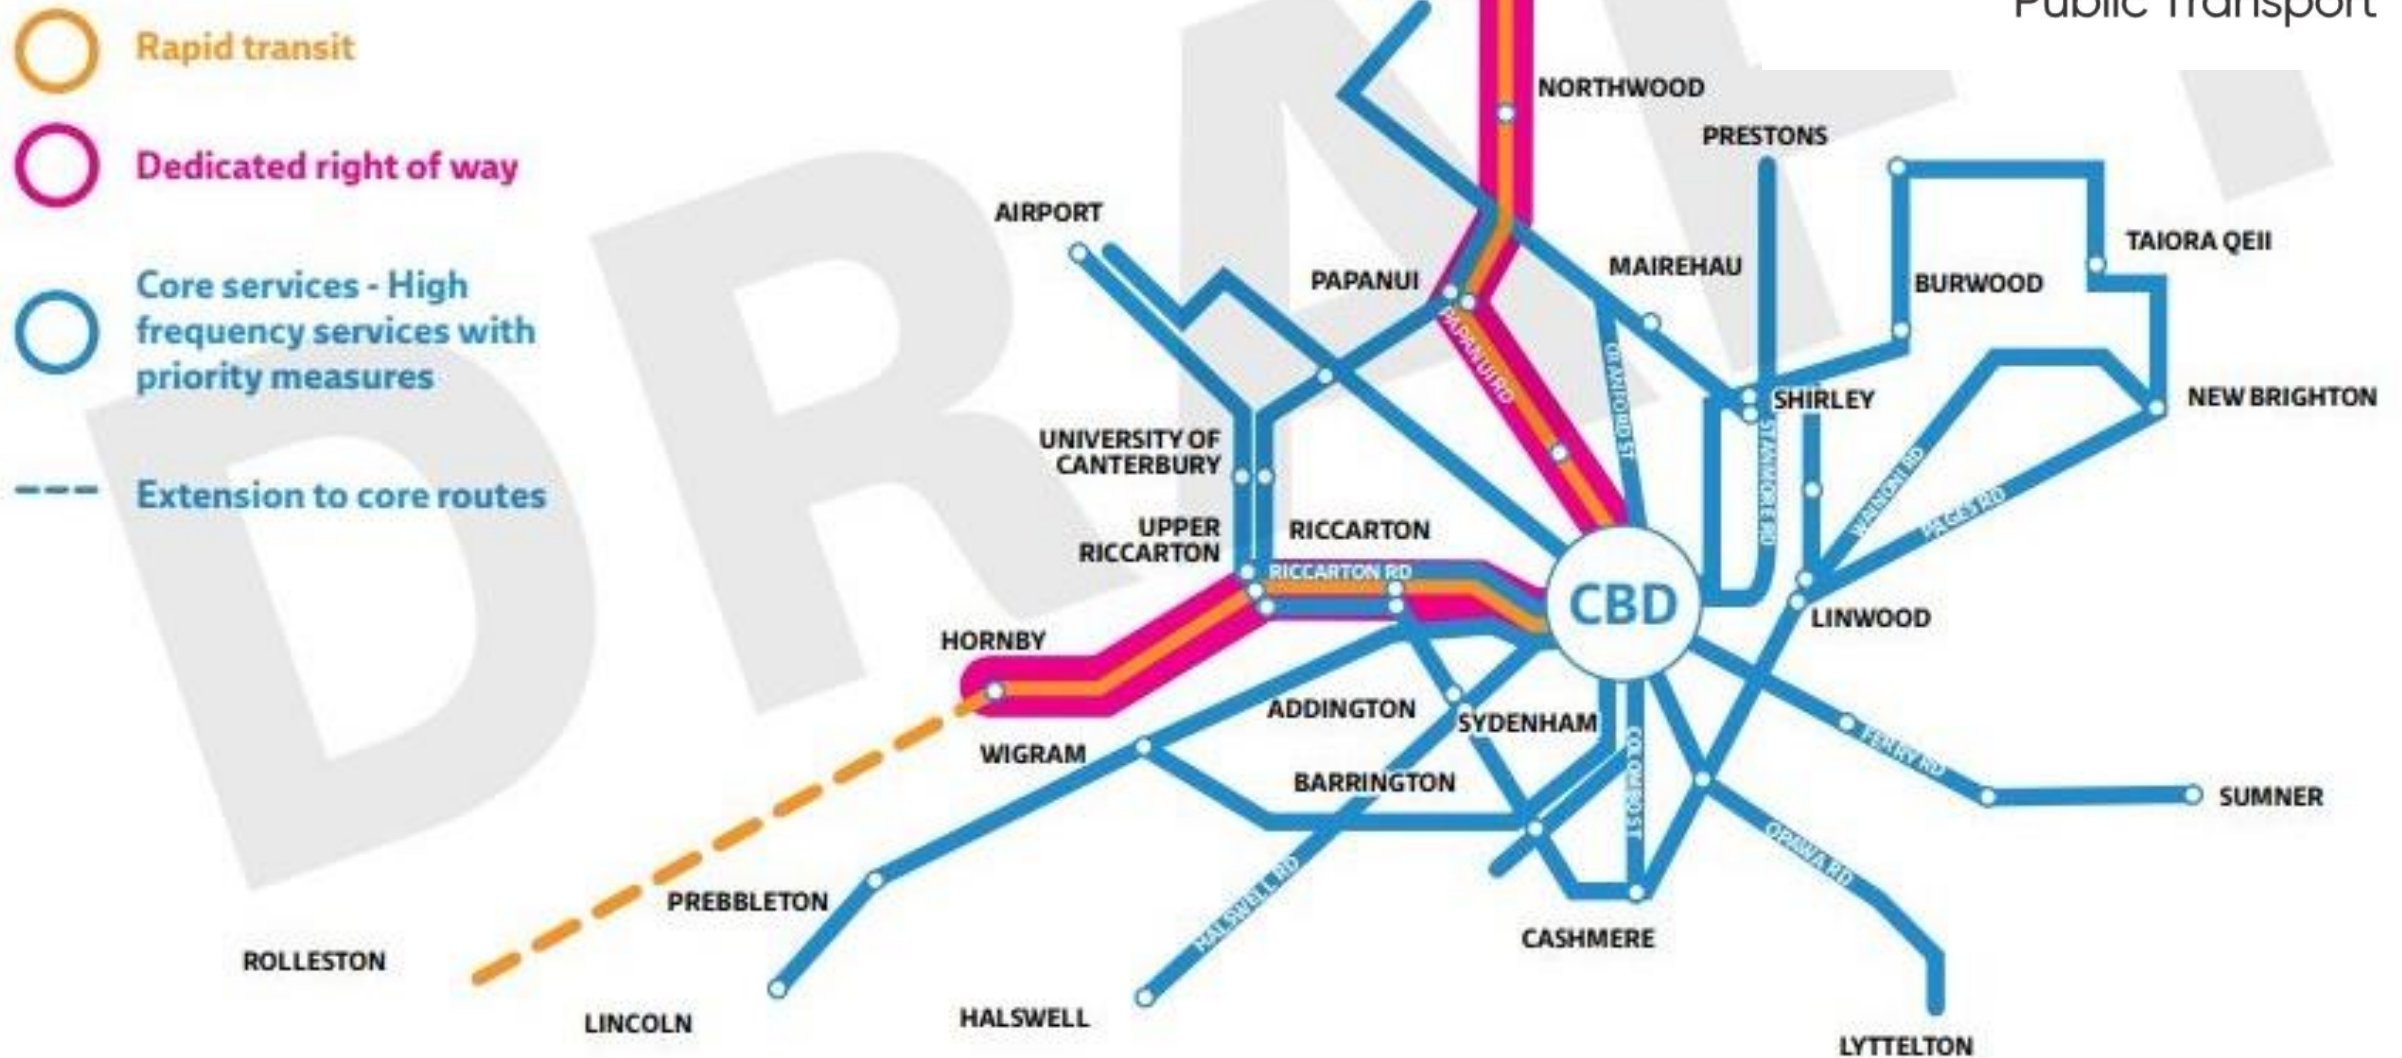

Dense employment

Future core routes & land use

Option 1

Option 1: Connect Canterbury

- Connect Canterbury proposal
 - Greater Christchurch Public Transport Joint Committee
 - ECan, NZTA, territorial local authorities
- We assume this means Bus Rapid Transit (BRT)
 - As opposed to rail
 - The report says that the committee is “mode-agnostic”
- Diagram shows priority corridor to Belfast and Hornby
 - That is, not beyond the city boundary
 - Rail does go beyond city boundary...

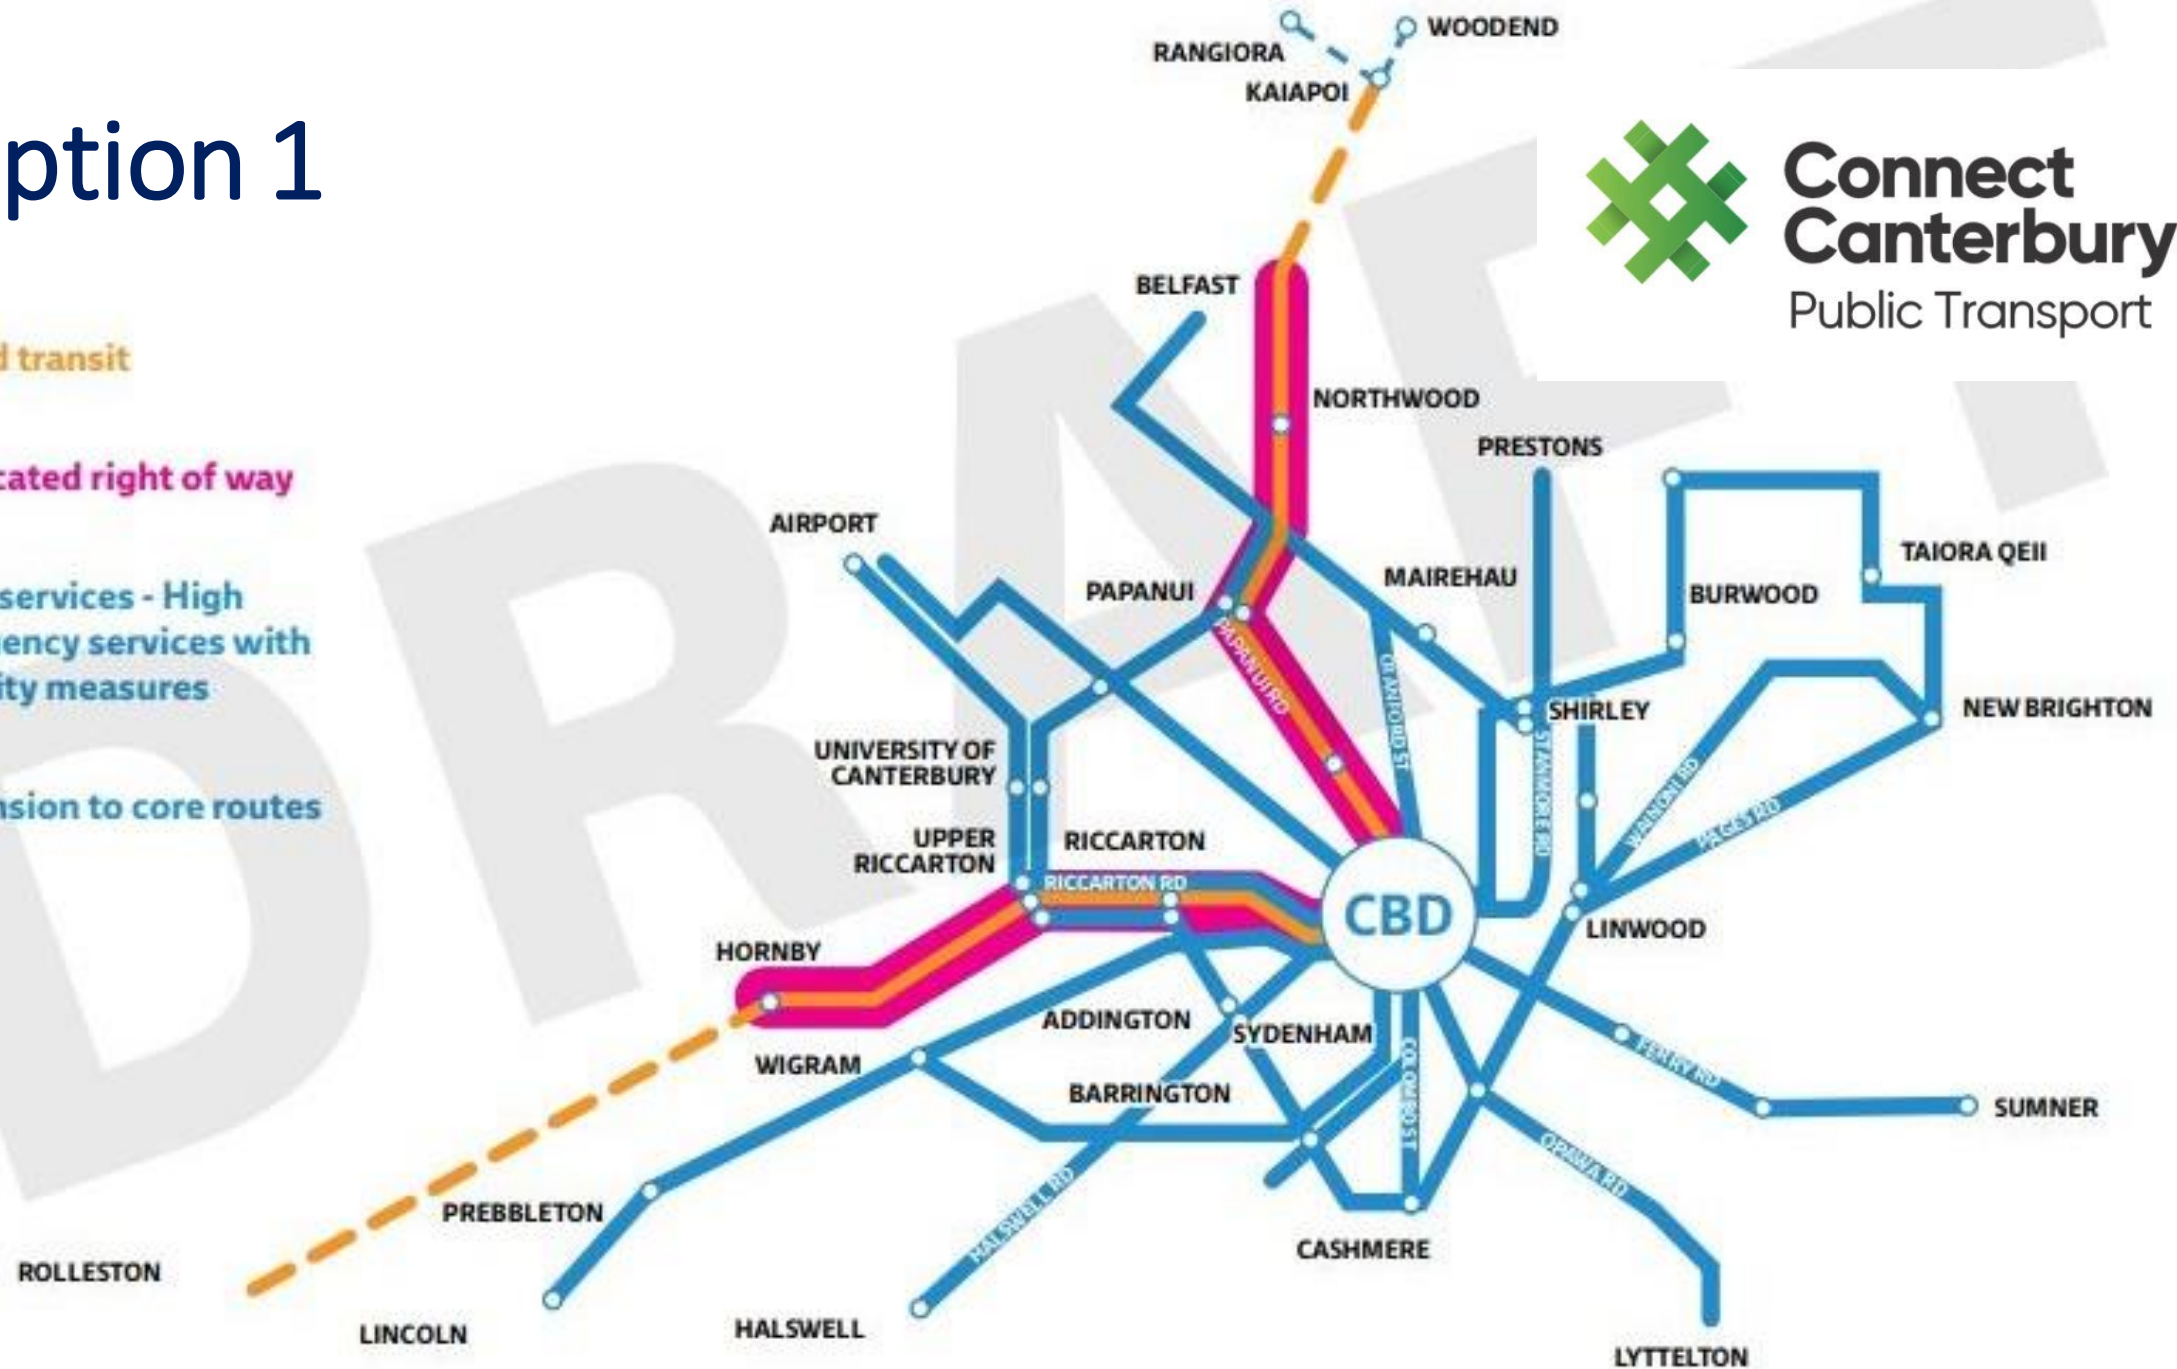

Option 1

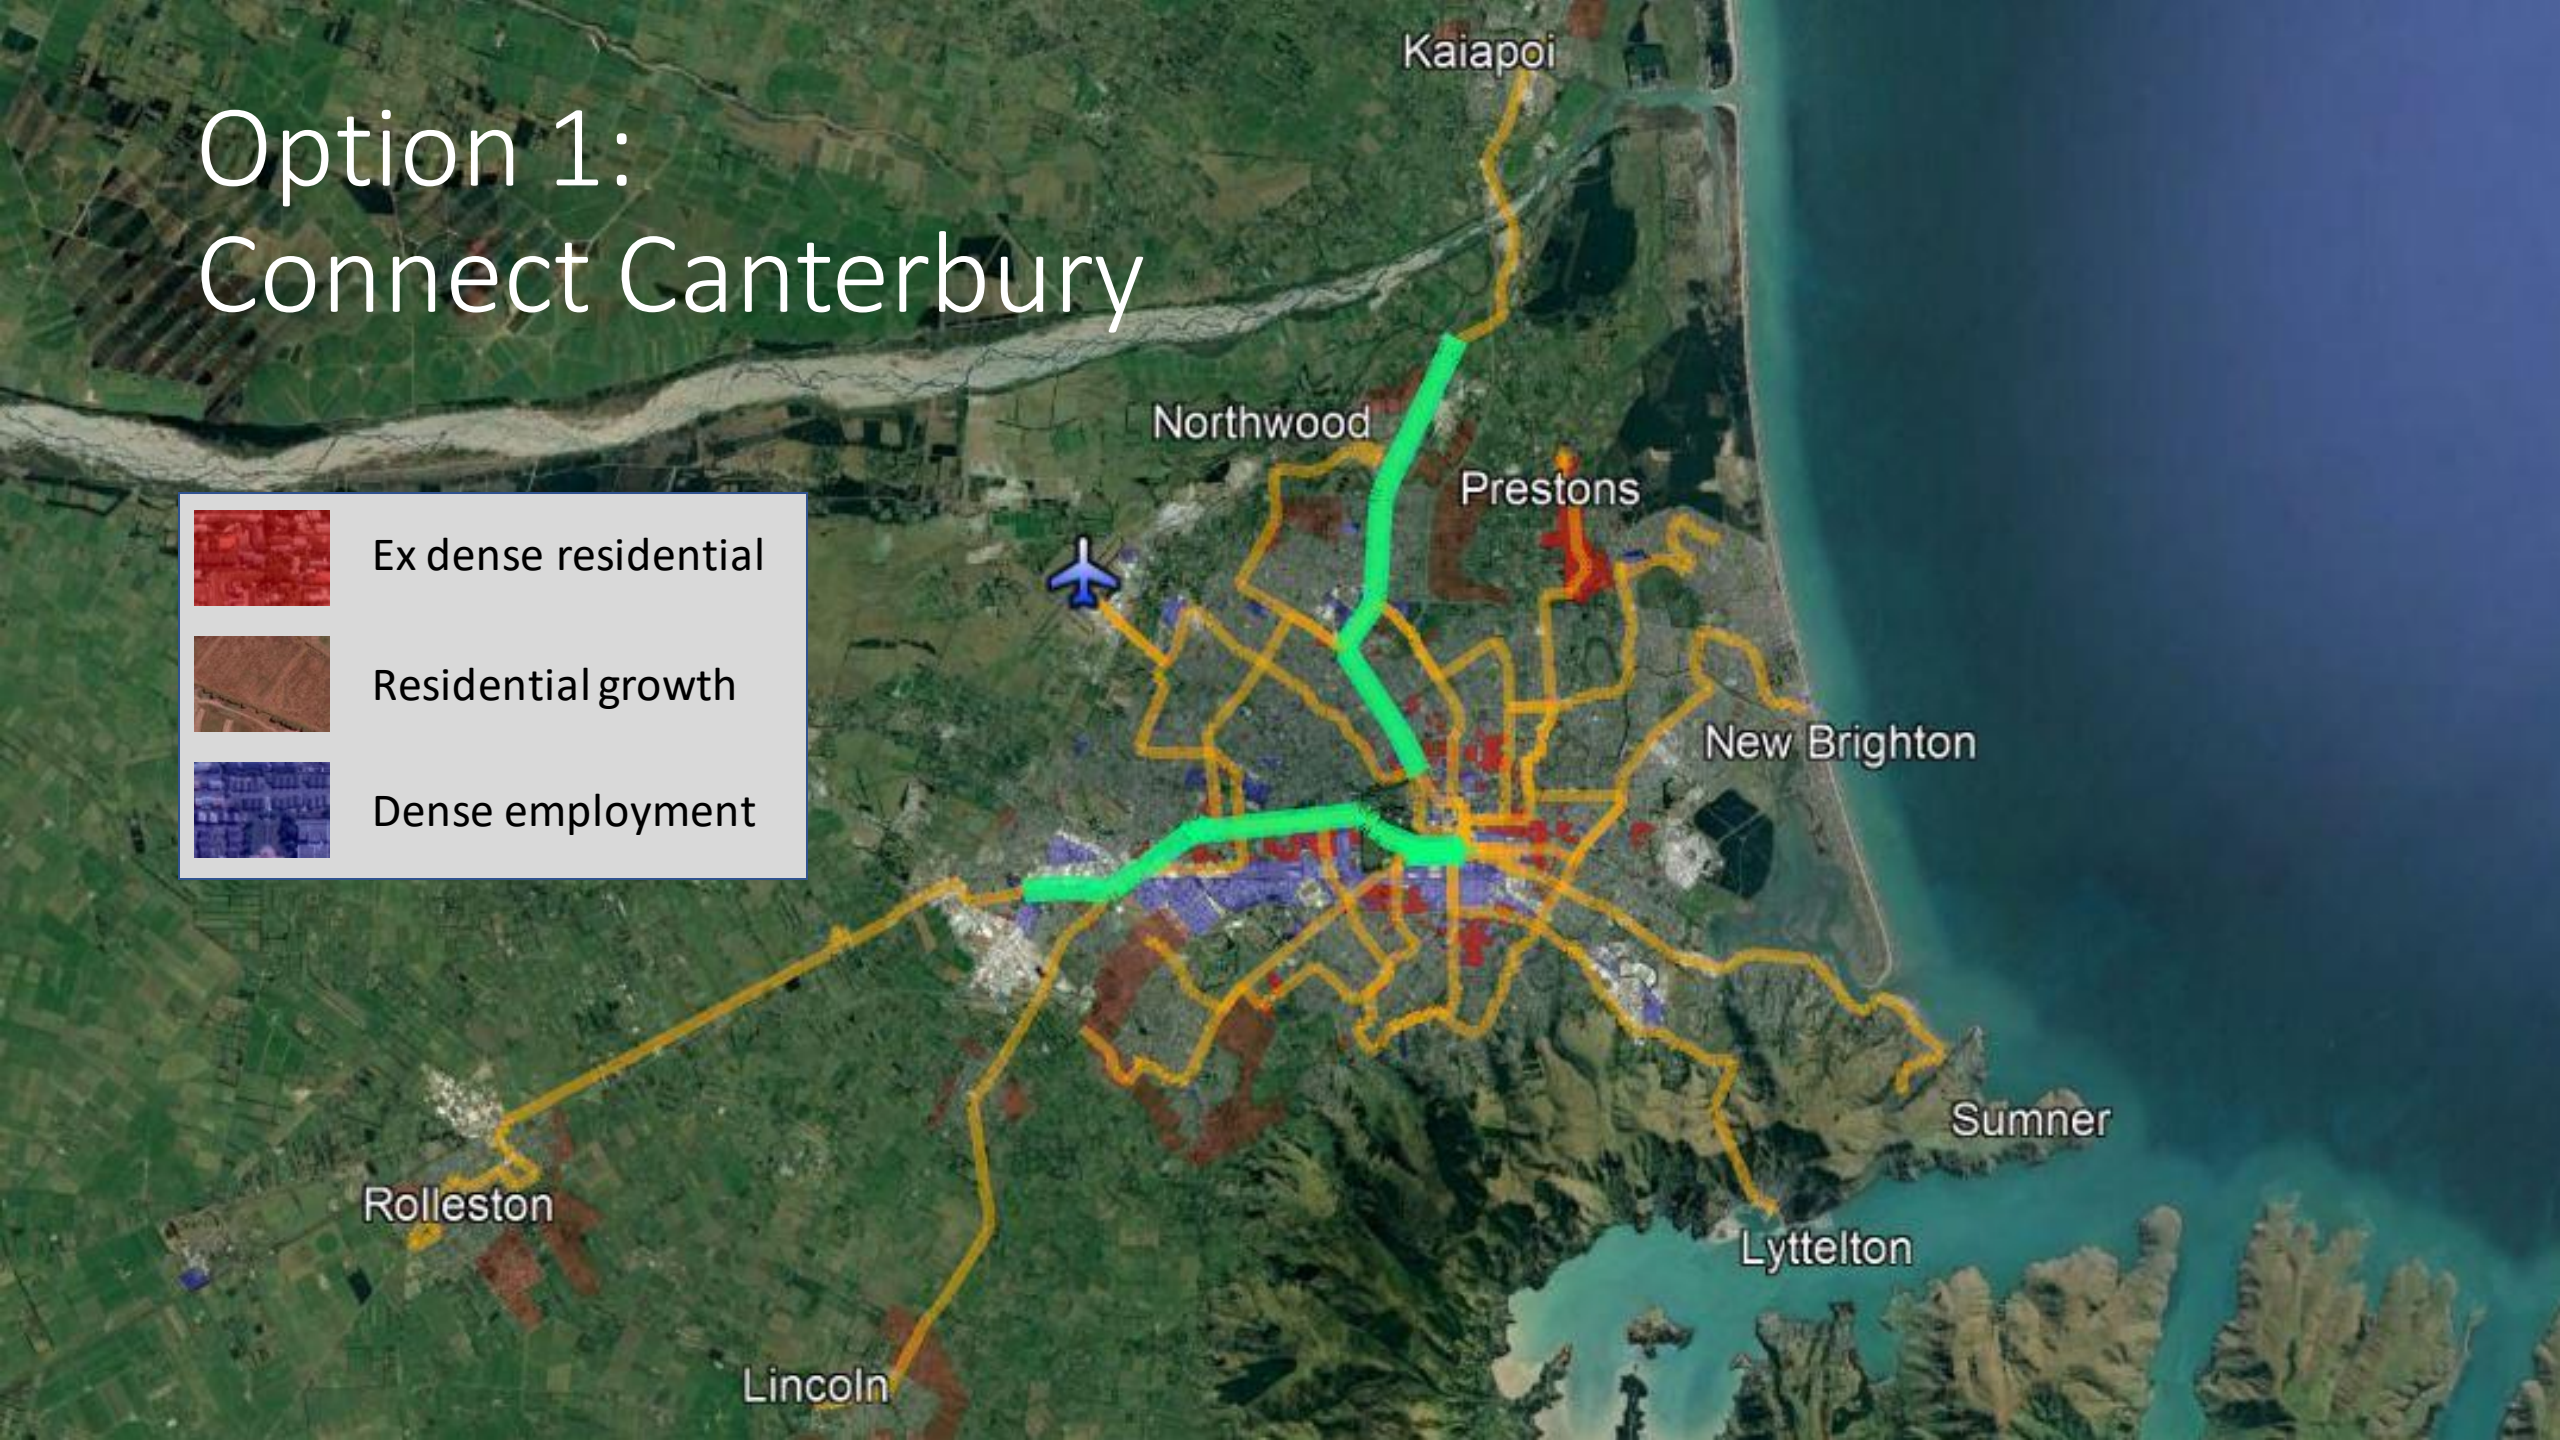

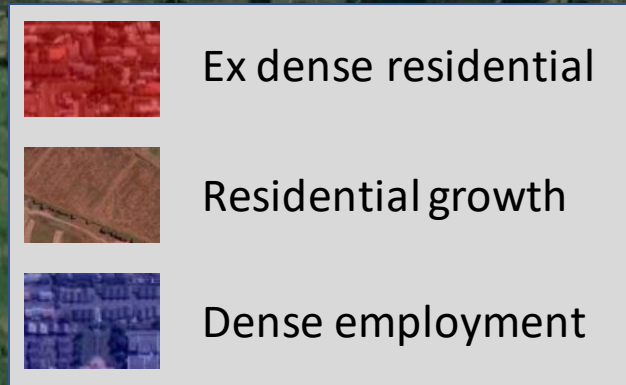

**Connect
Canterbury**
Public Transport

-  Rapid transit
-  Dedicated right of way
-  Core services - High frequency services with priority measures
-  Extension to core routes

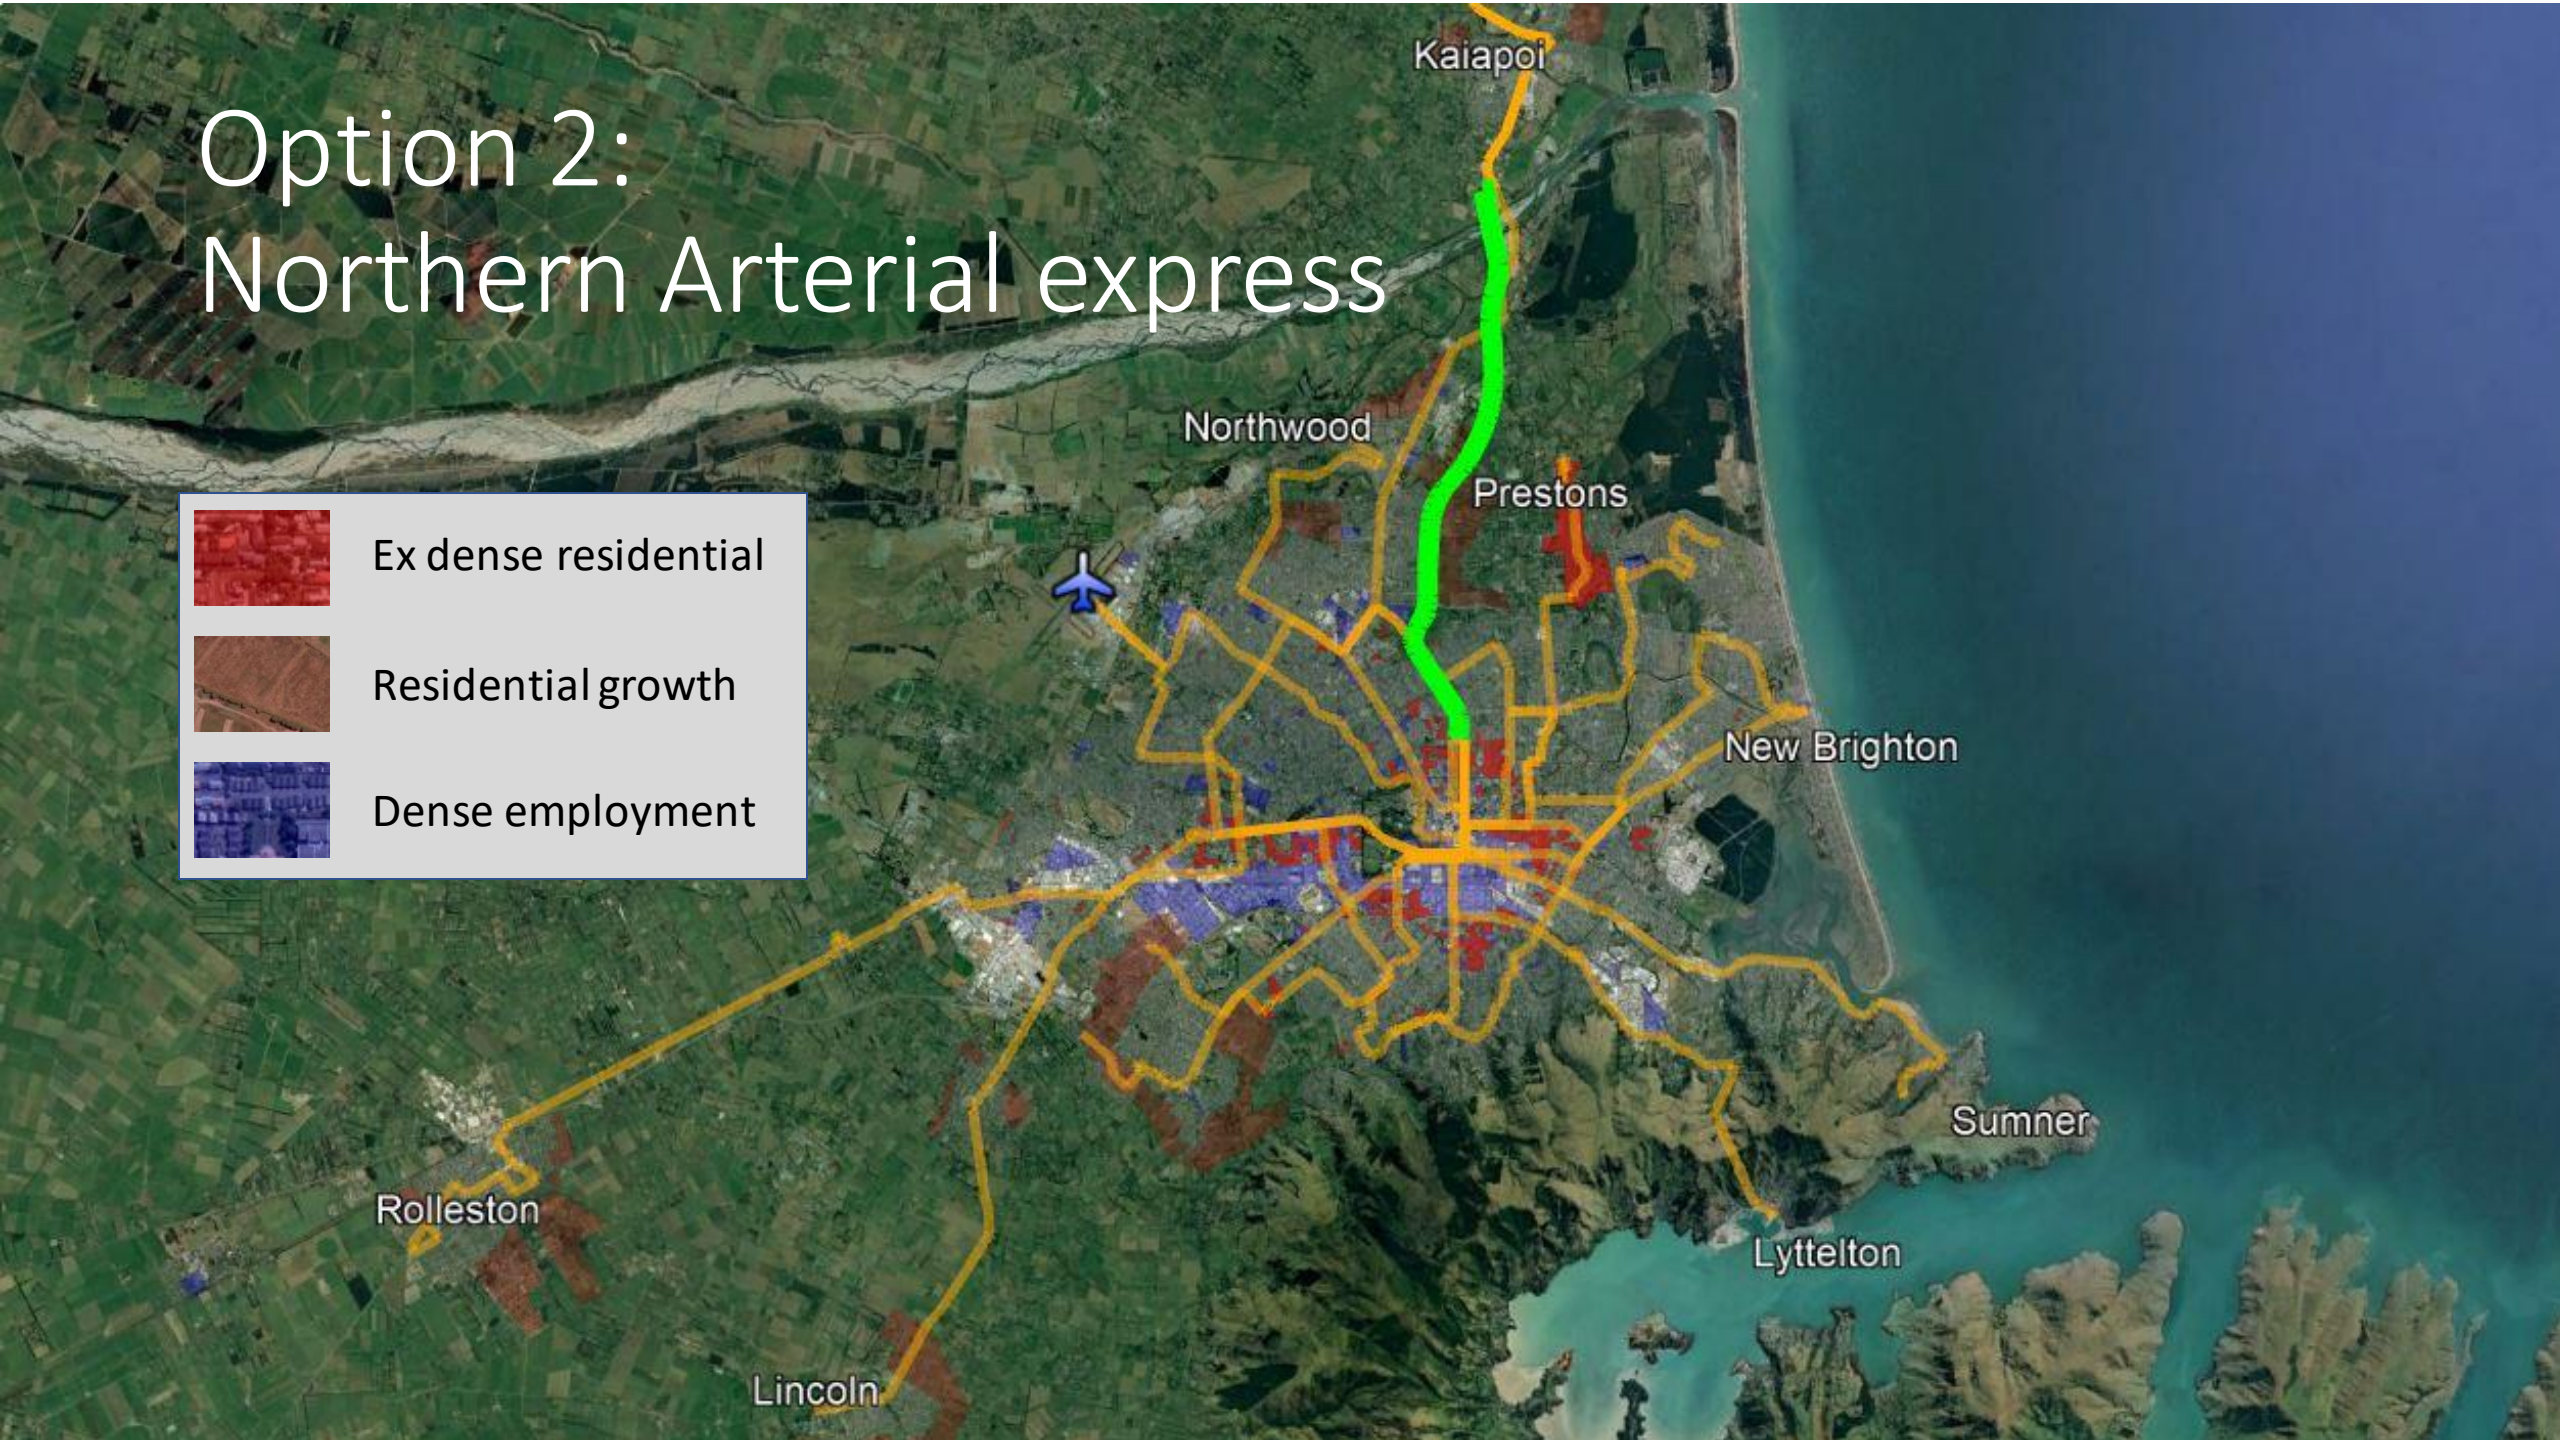

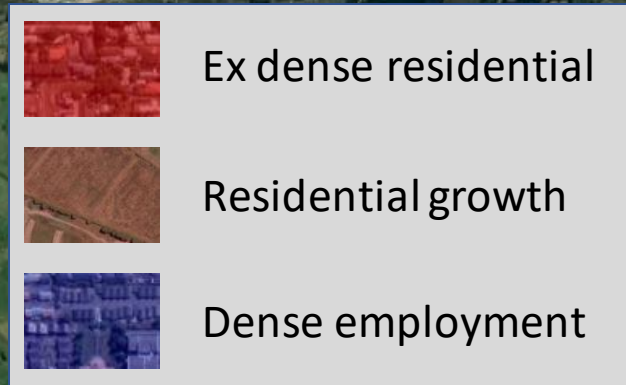

Option 1: Connect Canterbury

Option 2: Express buses on Northern Arterial

- Proposal developed for St Albans Residents' Association
 - Use outside lanes on Northern Arterial as permanent bus lanes
 - Bus lanes down to Edgware Road; reach city via Manchester St
 - Extend core service to Rangiora via Kaiapoi
- Northern Arterial to open mid-2020
 - Interim decision expected tomorrow
- Large residential growth area adjacent to corridor

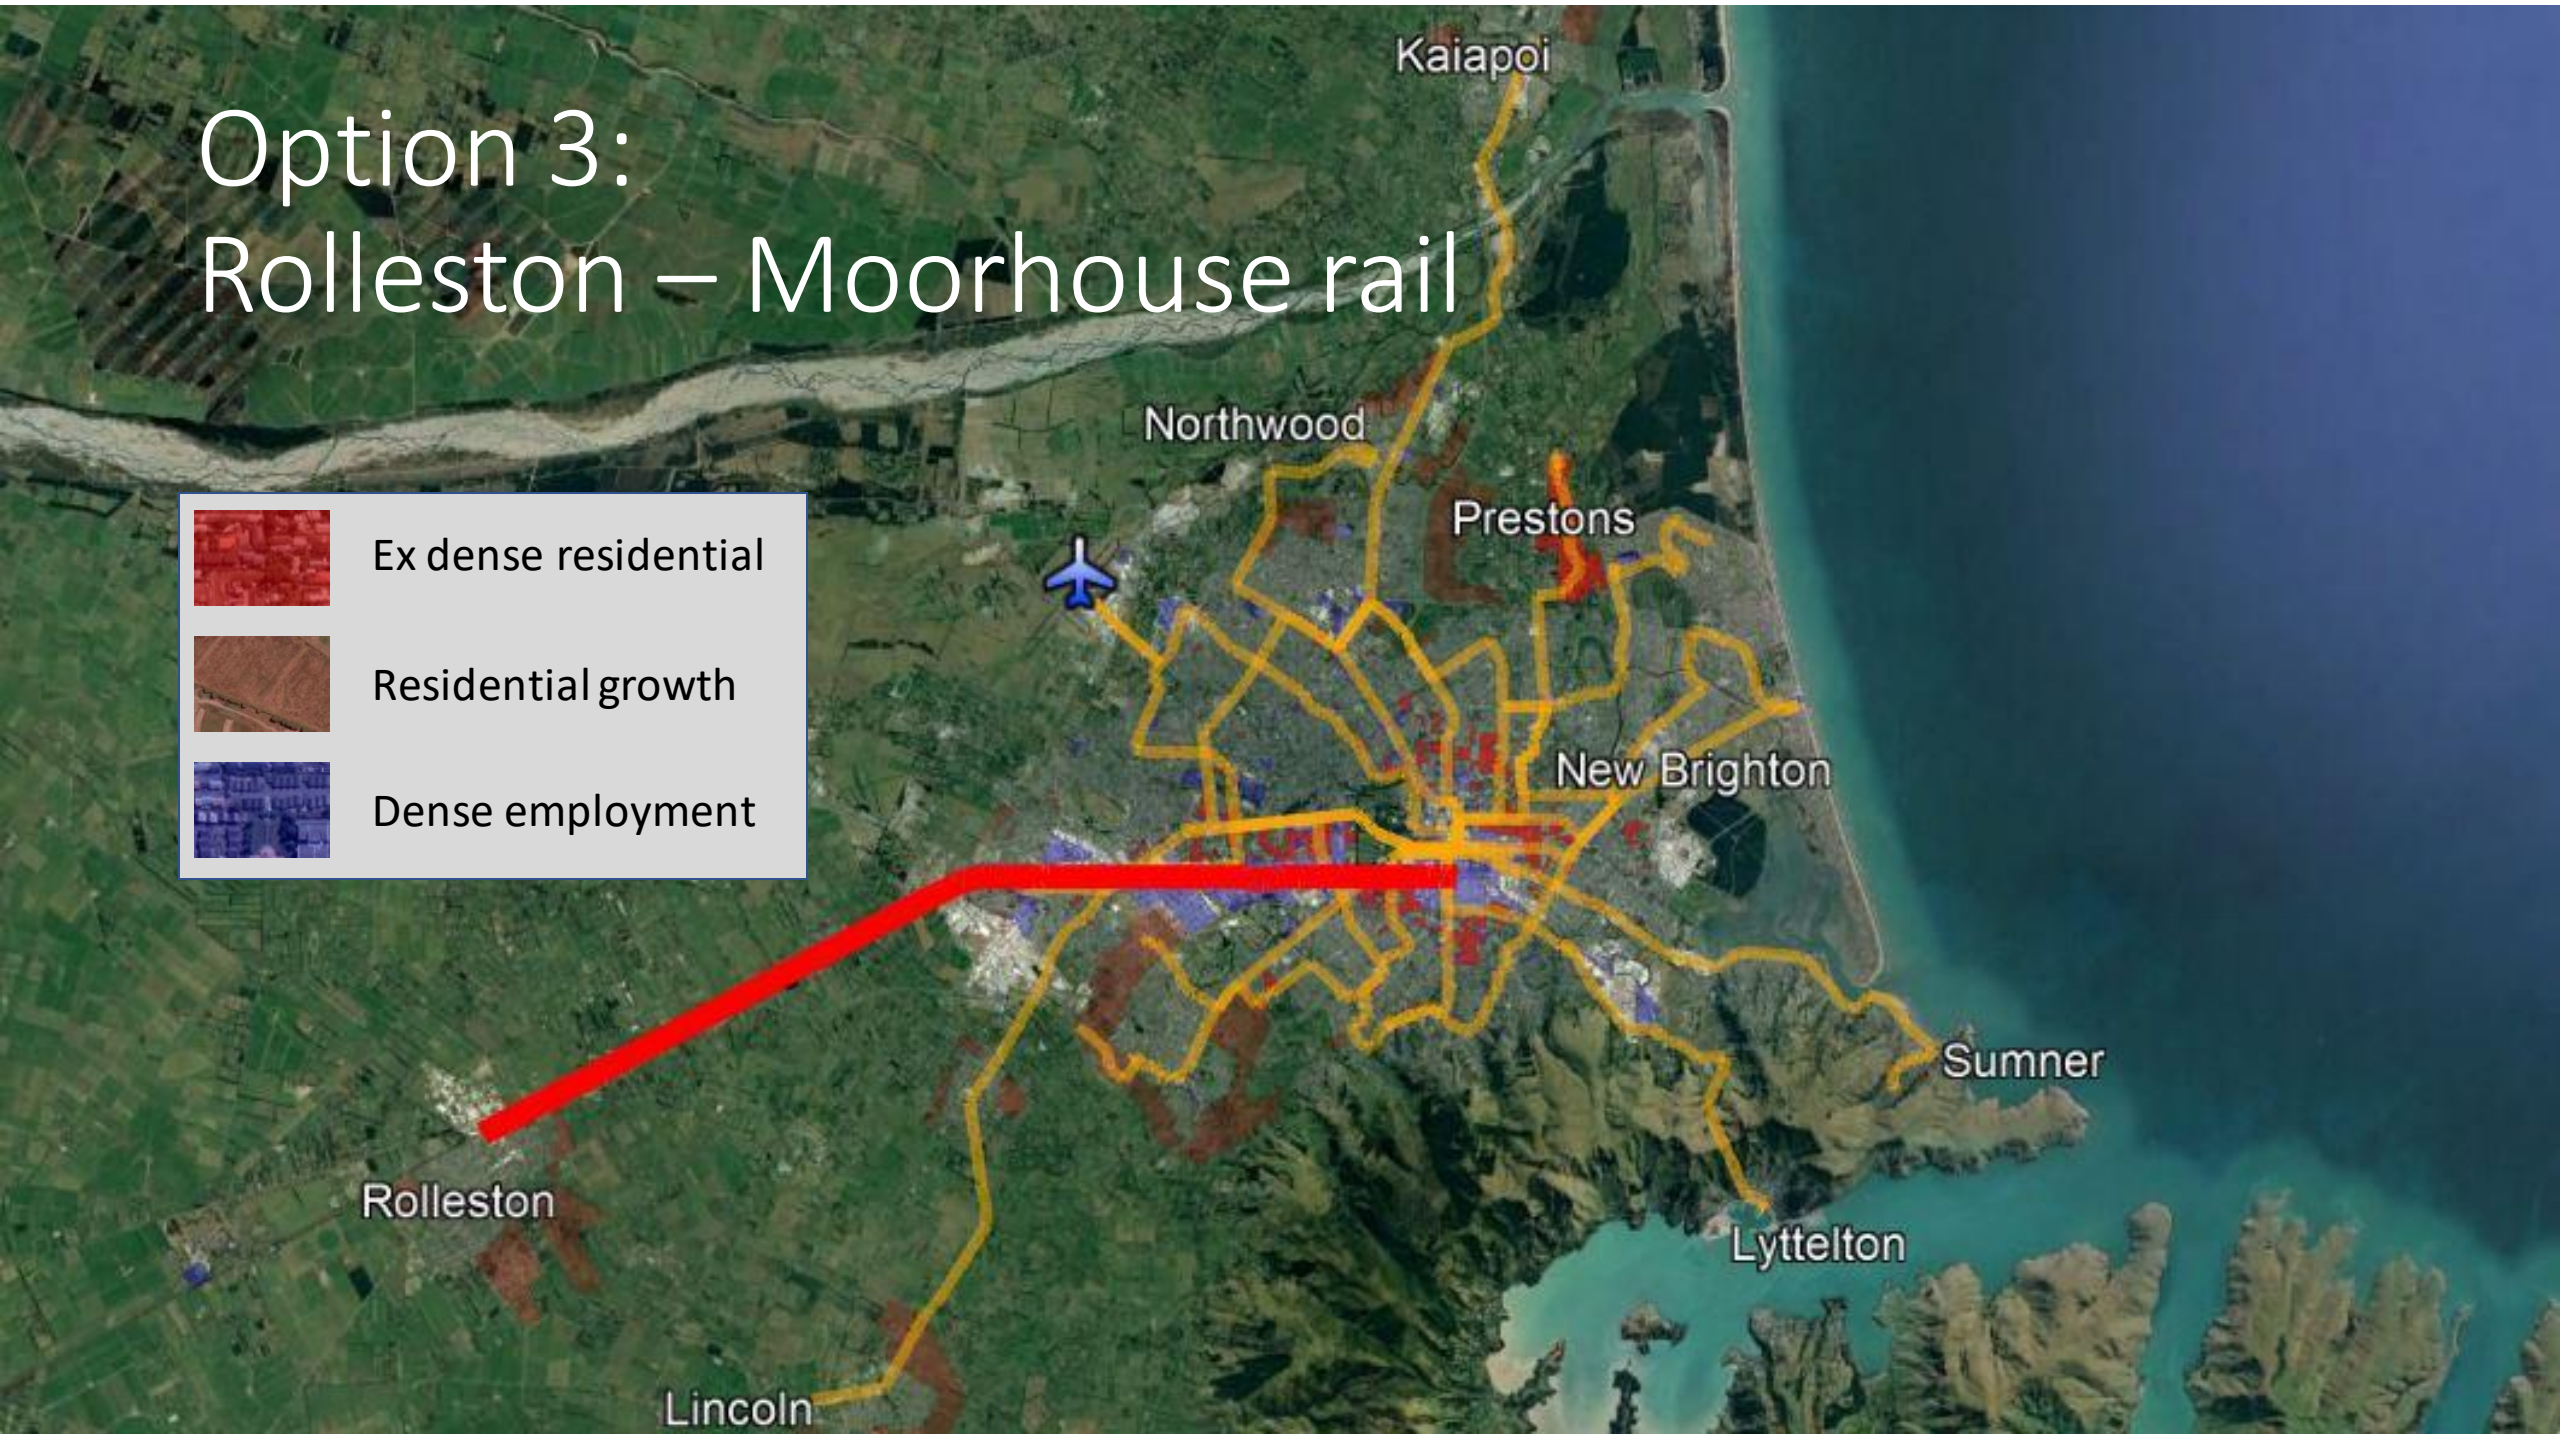

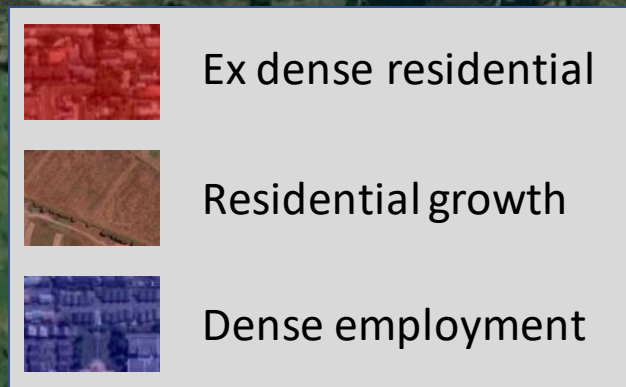

Option 2: Northern Arterial express

Option 3: Rolleston – Moorhouse rail

- Use existing heavy rail corridor
 - Rolleston – Moorhouse Ave
- Termini at
 - Rolleston
 - Colombo Street (transfer to buses)
 - Plus intermittent stations
- If tram-trains chosen, could extend line into central city
 - Via Manchester St or Madras St to stadium and bus station

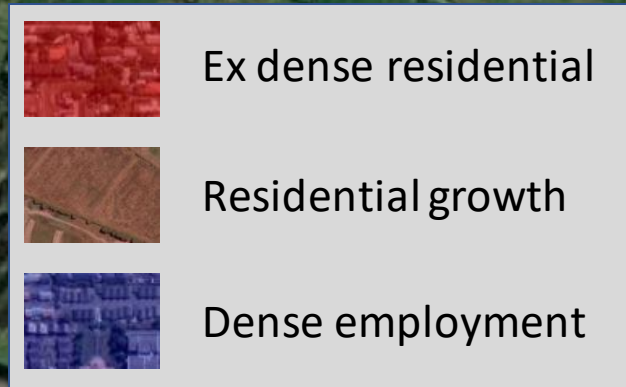

Option 3: Rolleston – Moorhouse rail

Option 4: Rangiora to Addington rail

- Use existing heavy rail corridor
 - Rangiora – Kaiapoi – Addington
 - Main transfer to city centre at Riccarton Road station
- Termini at
 - Rangiora
 - Addington
- If tram trains chosen, could divert line into central city
 - Via Riccarton Ave & bus station to proposed stadium
- Could extend line further north (Amberley)

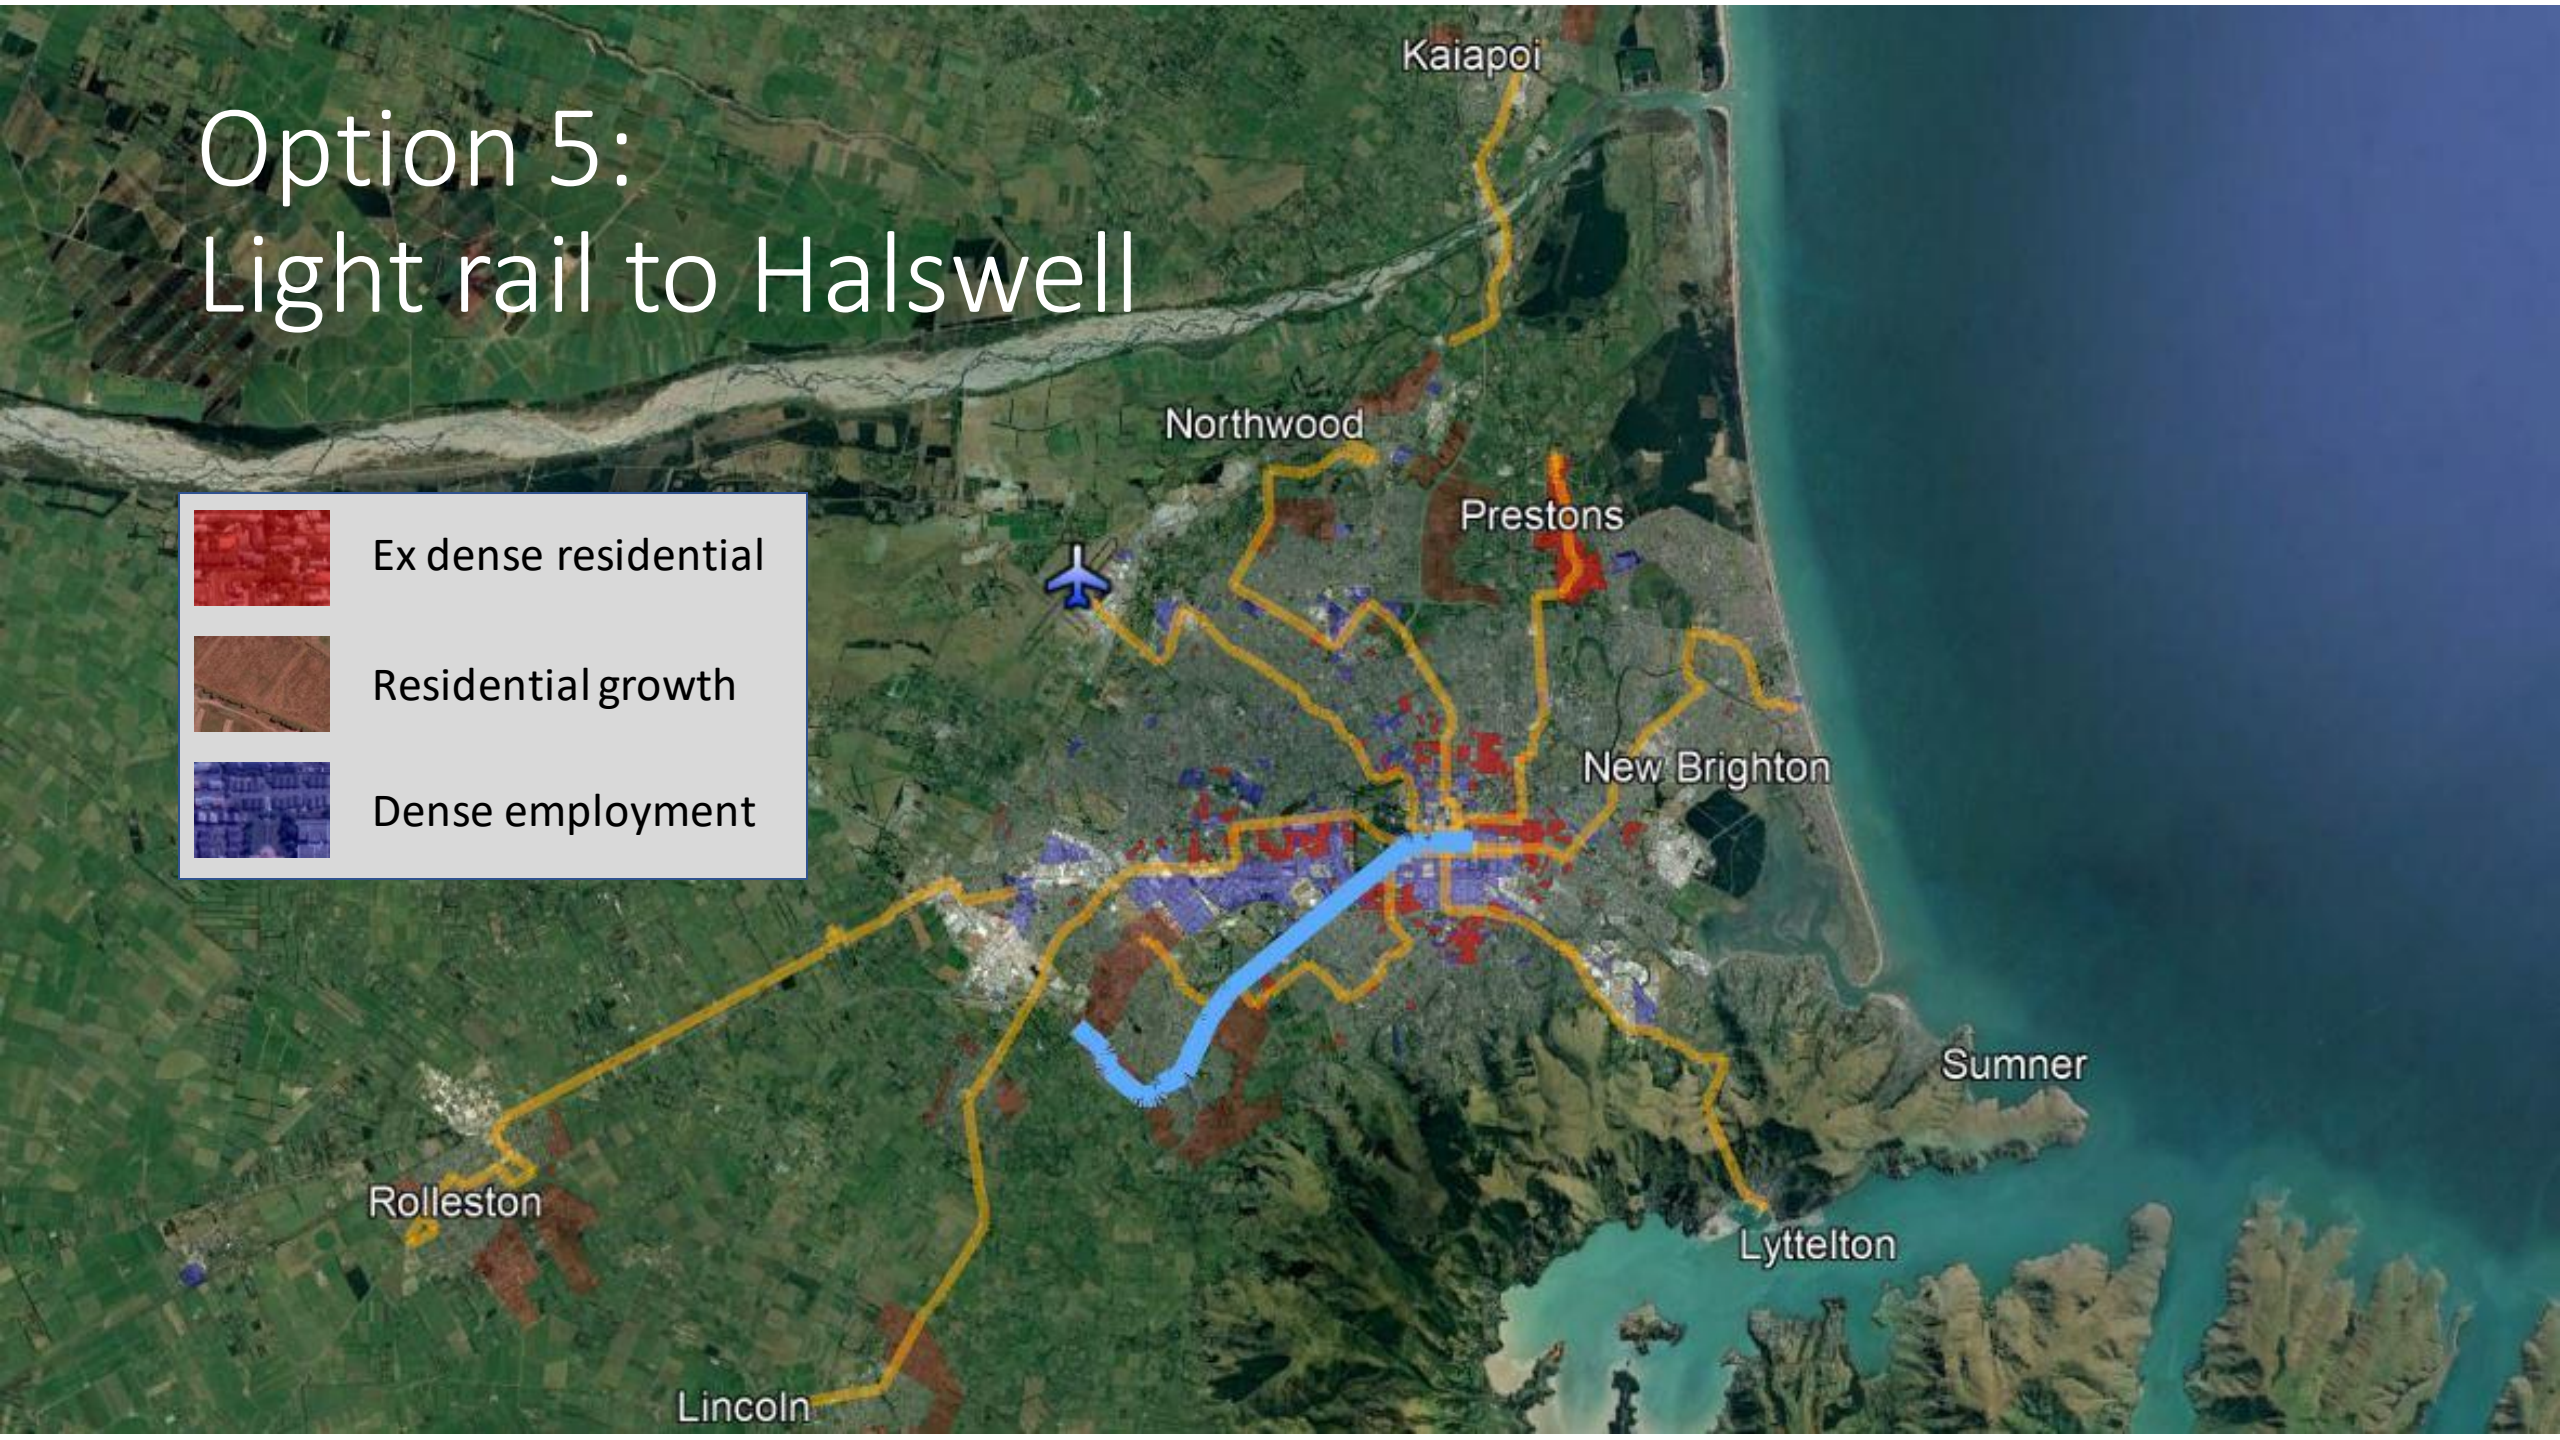

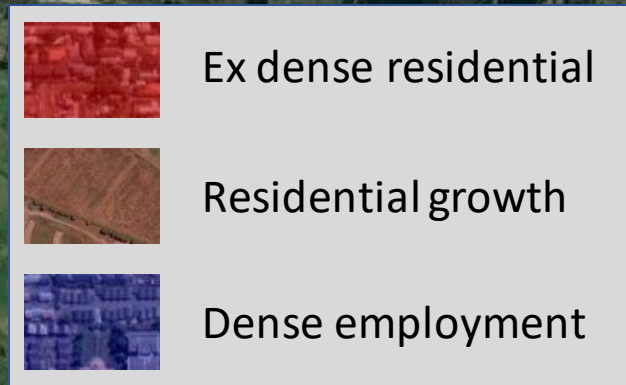

Option 4: Rangiora-Addington rail

Option 5: Light rail to Halswell

- Light rail from stadium via hospital / Addington to Halswell
 - Via Halswell Road
 - Could go via Henderson Basin instead (high density housing)
- Light rail system
- If tram-train chosen, could be combined with opt's 3 & 4 & 6
- Could be extended to Prebbleton or Lincoln

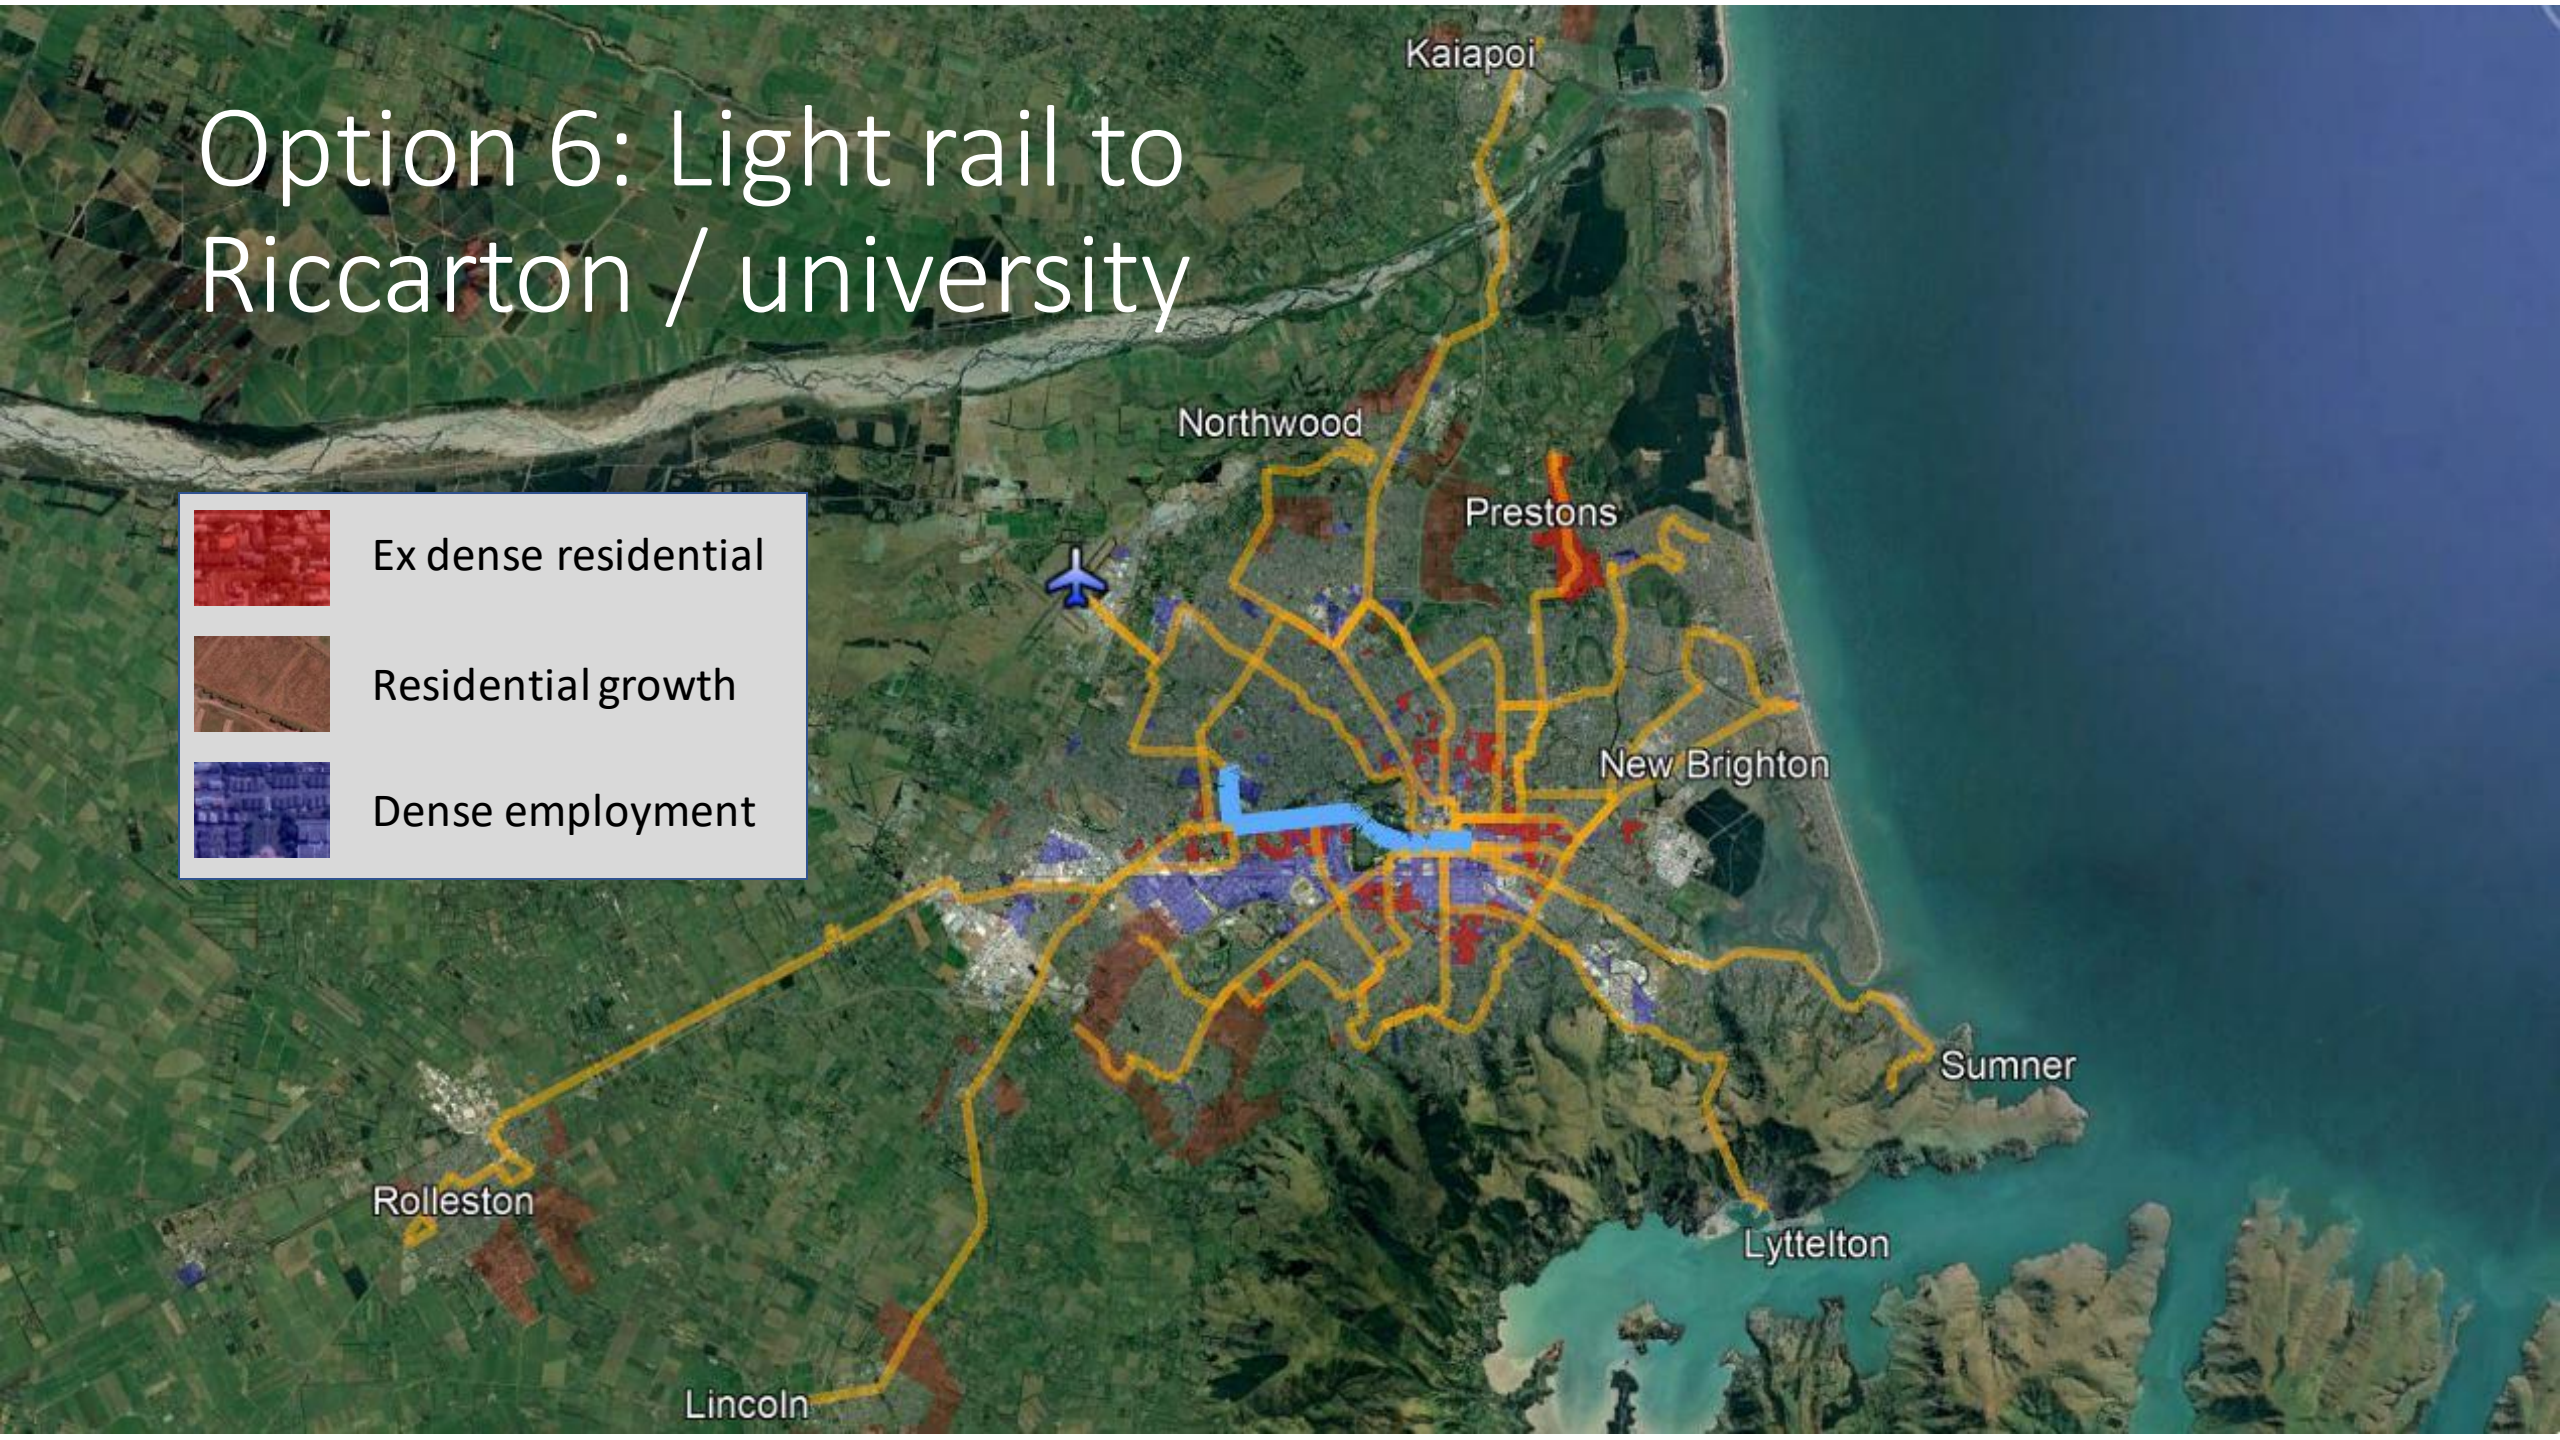

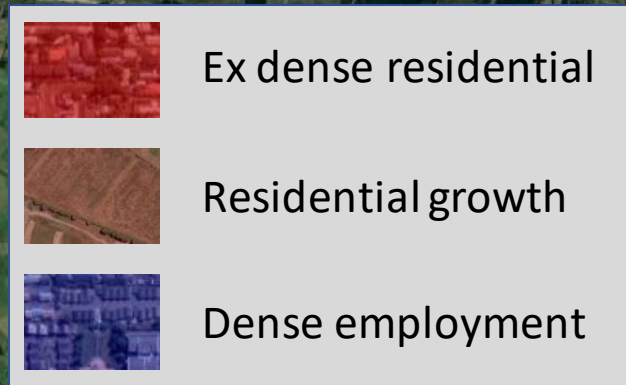

Option 5: Light rail to Halswell

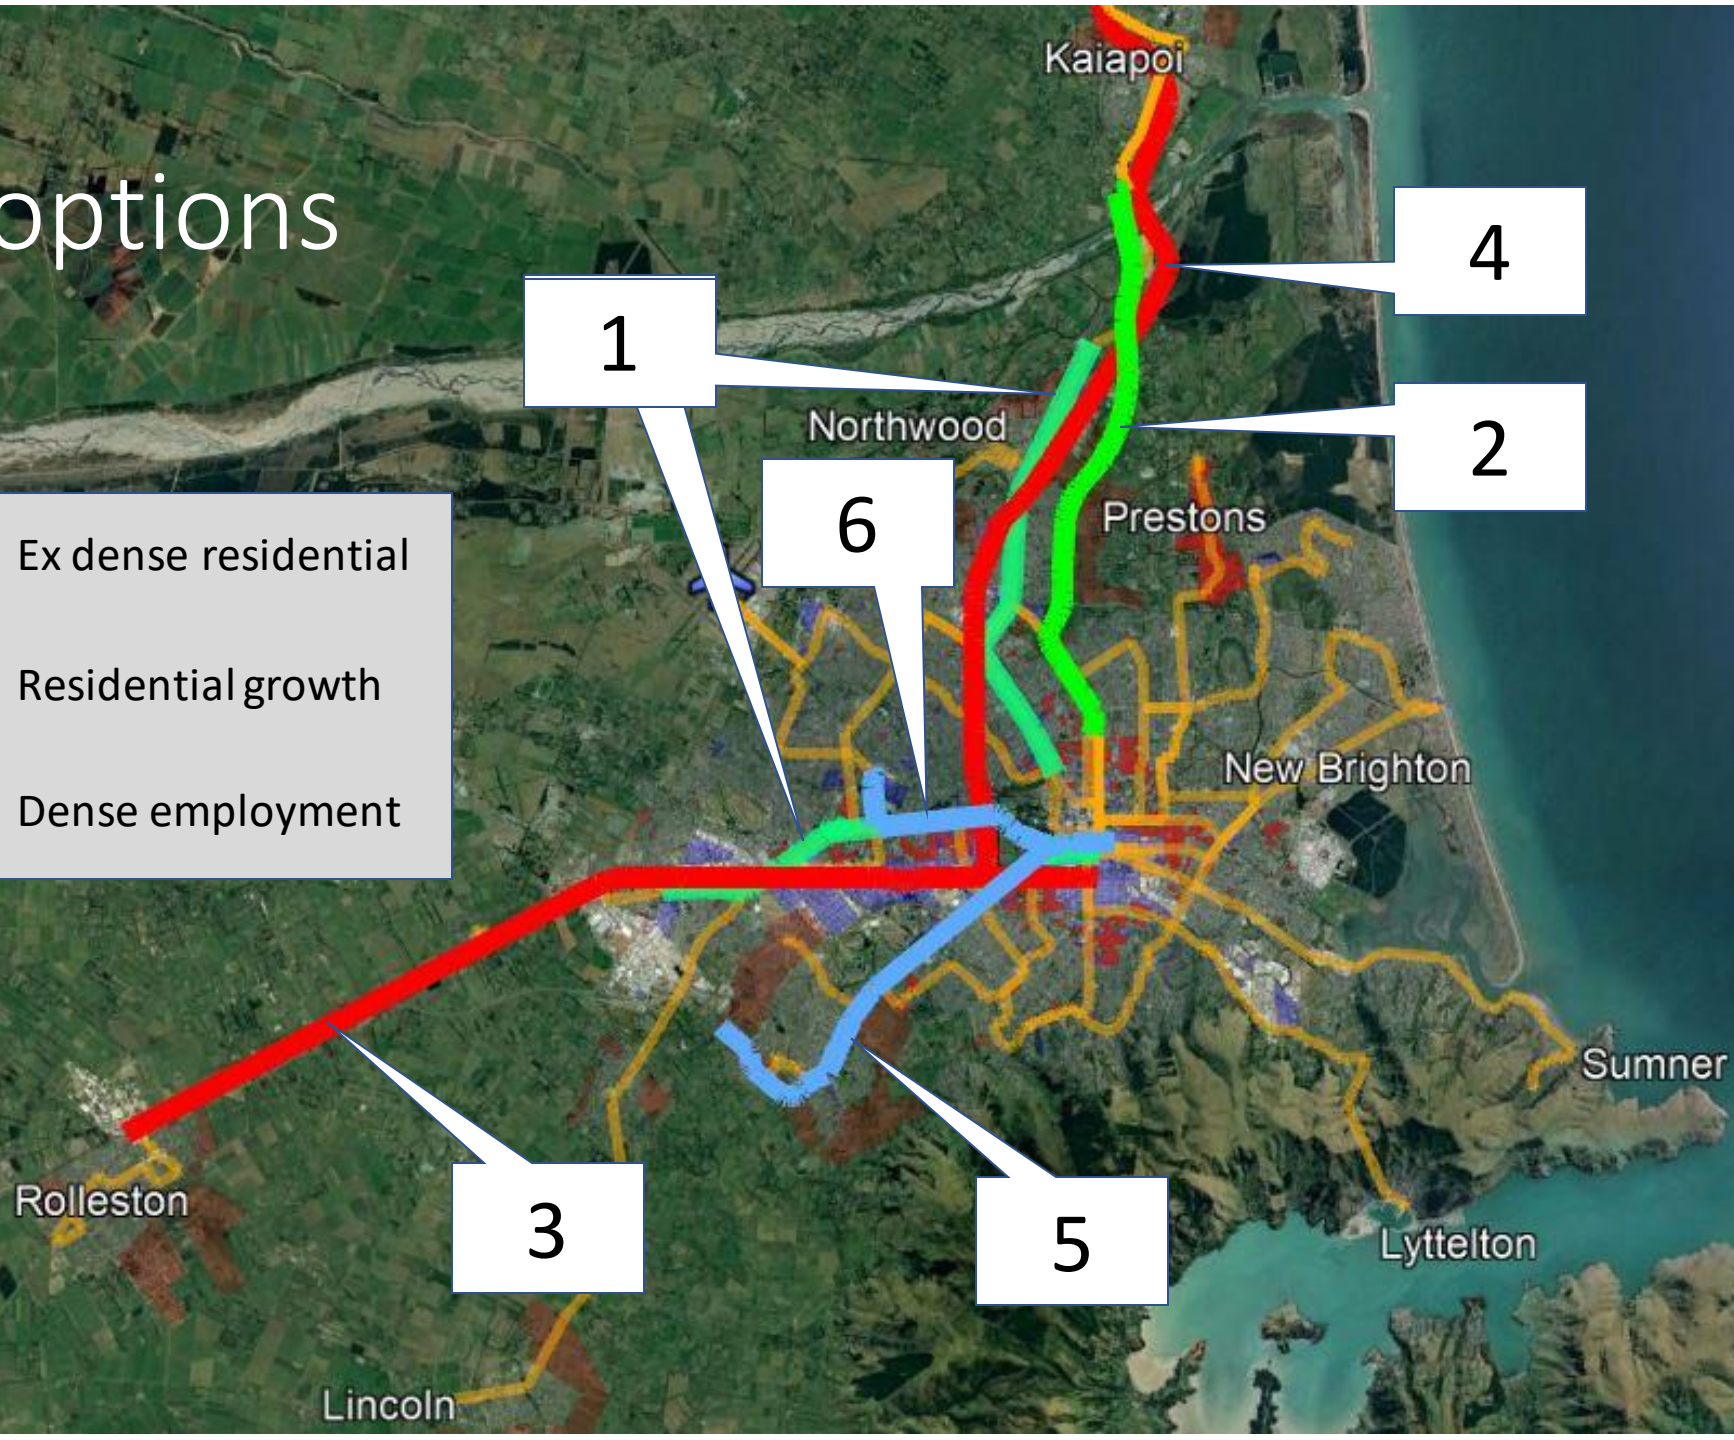

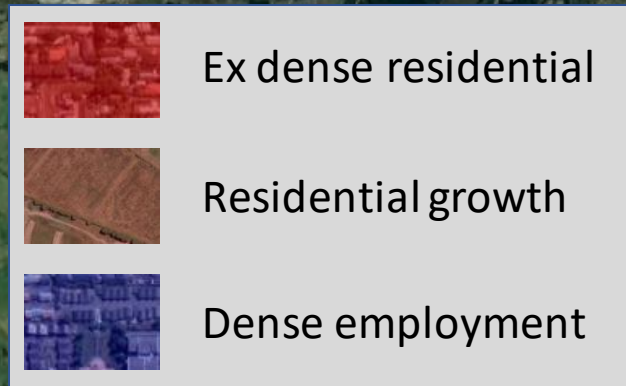

Option 6: Light rail to university

- Light rail from stadium to Riccarton & university
 - Via hospital
- Light rail system
- If tram-train chosen, could be combined with options 3 to 5
- Could be extended to Burnside and Airport
- Relatively short line
 - Not much density beyond university
 - Extend south to Sydenham?

Option 6: Light rail to Riccarton / university

All options

Evaluation

Emergency Instructions

EMERGENCY
INTERCOM

Decision-Making about Options

- Having generated some Options we now need to evaluate their **relative merits**
- Easier to evaluate ***quantitative*** attributes
 - e.g. Costs, \$Benefits, Maximum Capacity, Frequency
 - A lot of work done to place \$values on attributes

How to combine attribute quantities with differing units?

How to also incorporate more intangible (qualitative) attributes into the process?

Multi-Criteria Assessment (MCA)

- Some Attributes can't be quantified
 - Need to assess them *qualitatively*
 - Have to somehow compare all criteria together
- One suggested approach
 1. Identify all **criteria/objectives** to be assessed
 2. Develop a rating **system** e.g. ++ / + / = / - / --
 3. Assign a **rating** to each criteria item
 4. Apply any **weightings** to ratings (*optional*)
 5. Determine **relative** "scores"

Do the overall ratings reflect your "gut feel"?

Simple MCA: House Buying

Criteria	House 1	House 2
Square Feet	2000	1800
# Bedrooms	4	3
# Bathrooms	1 1/2	3
Lot Size	1/4	1/2
Location	10	15
Condition	Ex	Good
TOTAL	4	2

Example: Lichfield St 2-Way Traffic

Objective		Option 1 - Basic 2-Way	Option 2 - Bus Priority	Option 3 - Pedestrian / Cyclist Priority	Option 4 - Option 2 with St Asaph 2- Way	Option 5 - Partial 2-Way																														
1	Safe and convenient pedestrian access along & across Lichfield Street	N	N	L	N	N

Recap: Suggested Objectives

From your previous feedback:

1. More reliable travel times (*regardless of travel mode*)
2. Lower-cost housing/transport to access key destinations
(*for productivity, social exchange, wellbeing, etc*)
3. Better perception/experience of public trpt (*frequency, comfort*)
4. Improved wellbeing for society (*safety, health, severance, etc*)
5. Improved environmental outcomes (*CO₂, pollutants, biodiversity*)
6. Better/more efficient use of space (*for land use & transport*)

Recall: Weighting of Objectives

How important is each Objective?

Mentimeter

Sumner

CHAT Club – Canterbury Housing and Transport

Workshop at Tūranga, 27 May 2019

Assessment of Rapid Transit Options against Key Objectives

In your table groups, review the six Options presented in this workshop and consider how well you think each one will achieve the six different Objectives presented at the last workshop. (For each Objective, the most important thing is the *relative scores between the different Options*)

Using your scores and the previously determined weightings, we will calculate the overall "score" for each Option, and present these at the next workshop.

Objectives being assessed:

1. More reliable travel times (regardless of travel mode)
 2. Lower-cost housing/transport to access key destinations (for productivity, wellbeing, etc)
 3. Better perception/experience of public transport (frequency, comfort, cost, etc)
 4. Improved wellbeing for society (safety, health, severance, etc)
 5. Improved environmental outcomes (CO₂, pollutants, biodiversity, etc)
 6. Better/more efficient use of space (for land use & transport)
- Score each Option against each Objective according to this 5-tier scale:

✓✓	Highly contributes to achieving the desired Objective.
✓	Somewhat contributes to achieving the desired Objective.
-	Little effect on desired Objective.
X	Somewhat detracts from achieving the desired Objective.
XX	Significantly detracts from achieving the desired Objective.

Objectives	Relative weighting	Option scores (see options overleaf)					
		Opt.1	Opt.2	Opt.3	Opt.4	Opt.5	Opt.6
1. More reliable travel times	10%						
2. Lower-cost housing/transport	20%						
3. Better perception/experience of PT	10%						
4. Improved wellbeing for society	20%						
5. Improved environmental outcomes	20%						
6. Better/more efficient use of space	20%						

Which option would you recommend? _____

(please leave these completed handouts on your table for us to collect at the end)

Feedback to:
Axel Wilke
Brendon Harre

axel@viatradia.nz
b.harre@hotmail.co.uk

Chris Morahan
Glen Koorey

chrismorahan@hotmail.com
glen@viatradia.nz

Now it's your turn!

(~30 minutes)

- In your table groups, review the remaining five Options presented in this workshop
 - How well do you think each one will achieve the given Objectives?
 - Score each Option on your form against the six Objectives
- (For each Objective, the most important thing is the **relative** scores between the different Options)*
- Later: We'll calculate the overall “score” for each Option, and present these at the next workshop

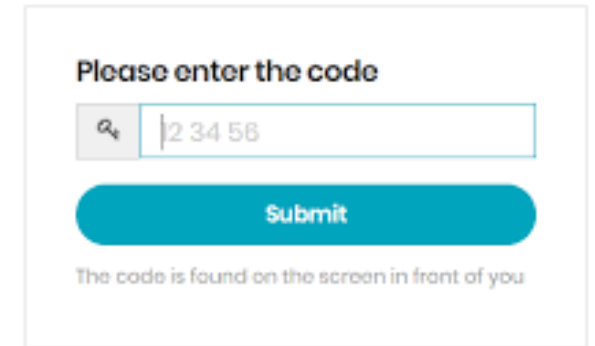

Menti exercise: What did you think of tonight?

Use your smartphone to give us some feedback

- Go to www.menti.com
 - Enter code number: **90 86 03**
 - Write some comments (up to 250 characters)
 - What did you learn? What did you like?
 - What didn't we cover? What do you disagree with? etc, etc

(You can submit more than one comment if you wish)
 - Click "Submit"
- (you can wait until the end to do this survey)*

A screenshot of the Mentimeter code entry interface. It shows a text input field with the code "90 86 03" entered. Below the input field is a blue "Submit" button. Above the input field, it says "Please enter the code". Below the button, it says "The code is found on the screen in front of you".

Follow up

- We will collate your workshop contributions
 - Collect your worksheets
 - Menti survey feedback
- Report back via
 - Talking Transport: www.talkingtransport.com
 - CHAT Club Facebook page: fb.com/groups/248229305886431/
(CHAT Club – Canterbury Housing and Transport)

Next workshop

- Monday, 1 **July** 2019
- 6:00 to 7:30 pm
- Activity Space (next to TSB Space on level 1) at Tūranga
- Key theme: *How do we make this happen in Canterbury?*

Talking Transport:

www.talkingtransport.com

CHAT Club Facebook page:

fb.com/groups/248229305886431/

Thank you!

- Don't forget to complete your final Menti survey (feedback)
 - Go to www.menti.com
 - Enter code number: **90 86 03**

See you next time!
